ENVIRONMENTAL CORPORATION OF AMERICA

December 8, 2010

PM&A
30 Mansell Court
Suite 103
Roswell, GA 30076

Attention: Mr. Matt Chastain

Subject: **Phase I Environmental Site Assessment**
Municipal Communications ATL102 (Senoia)
300 Howard Road
Senoia, Coweta County, Georgia
ECA Project Number: L-568-4

Dear Mr. Chastain:

Environmental Corporation of America (ECA) is pleased to provide this report of our Phase I Environmental Site Assessment. This work was authorized on November 8, 2010.

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-05, of the subject Property. Any exceptions to, or deletions from, this practice are described in Section 2.4 of this report.

We discovered that the property to the north is used as a wastewater spray field that was developed by Southern Mills. Southern Mills is listed on several environmental databases and has known releases of acetone, dichloro-benzene, dichloroethene, trichloro-ethene, vinyl chloride, methylene chloride, chloroform, and carbon disulfide in the groundwater. Based on the known relationship between Southern Mills and the adjacent spray fields, it is possible that contaminated wastewater could have entered the wastewater system and impacted the Property. We consider this a recognized environmental condition to the Property. A Phase II Environmental Site Assessment is concurrently being conducted and results will be reported separately.

Mr. Matt Chastain

1.0 SUMMARY

ECA was retained by PM&A (on behalf of Municipal Communications, LLC) to conduct a Phase I Environmental Site Assessment of the Property. The Property location is shown in Figures 1 and 2 of Appendix A. The Property is a 100-foot by 100-foot lease area to be developed into a telecommunications facility.

The purpose of this assessment was to identify recognized environmental conditions in connection with the Property in accordance with ASTM E1527-05. The report was prepared for the sole use of PM&A and Municipal Communications, LLC and is considered Proprietary Information.

We discovered that the property to the north is used as a wastewater spray field that was developed by Southern Mills. Southern Mills is listed on several environmental databases and has known releases of acetone, dichloro-benzene, dichloroethene, trichloro-ethene, vinyl chloride, methylene chloride, chloroform, and carbon disulfide in the groundwater. Based on the known relationship between Southern Mills and the adjacent spray fields, it is possible that contaminated wastewater could have entered the wastewater system and impacted the Property. We consider this a recognized environmental condition to the Property. A Phase II Environmental Site Assessment is concurrently being conducted and results will be reported separately.

2.0 INTRODUCTION

2.1 Purpose

The purpose of this assessment was to identify “recognized environmental conditions” in connection with the Property, in accordance with ASTM E1527-05, by means of record reviews, site reconnaissance, interviews, and preparation of this report.

A recognized environmental condition is defined by the ASTM E1527 standard as “the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. This term includes hazardous substances or petroleum products even under conditions in compliance with laws.”

This Phase I Environmental Site Assessment has been conducted in accordance with the American Society for Testing and Materials (ASTM) Standard E1527-05, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*. If applicable to the proposed transaction and per the ASTM standard, this assessment was “intended to permit a *user* to satisfy one of the requirements to qualify for the *innocent landowner, contiguous property owner, or bona fide prospective purchaser* limitations on CERCLA liability (hereinafter, the “*landowner liability protections*,” or “*LLPs*”): that is, the practice that

constitutes *all appropriate inquiry* into the previous ownership and uses of the *property* consistent with good commercial or customary practice.”

2.2 Detailed Scope of Services

The following scope of work was performed to fulfill the project purpose:

- A Records Review was conducted to include an evaluation of the physical setting of the Property (geology, soils and groundwater conditions, topography, floodplain and wetlands potential), database searches, and public records review. ECA retained Environmental Data Resources, Inc. (EDR) to conduct a database search of the applicable local, tribal, State, and Federal databases. Other record sources that may include information on environmental conditions and historical use were also searched by ECA, as needed or required by the ASTM standard. The EDR database report is included in Appendix D. Section 5.0 of this report discusses the results of our records review.
- A Site Reconnaissance was conducted of the subject Property to identify evident releases and potential sources of releases that may have resulted from current or past uses. Such sources include above and below ground storage tanks, PCB-containing equipment, drums, debris, stressed vegetation, and surface stains. The Property was also inspected for obvious visual evidence of flood plains and wetlands, even though these items are “non-scope considerations” in ASTM, as discussed in Section 2.4 below. Section 6.0 contains a discussion of our field observations.
- Interviews were conducted to assess the potential for recognized environmental conditions of the Property. Parties interviewed included individuals familiar with the Property such as the current and past owners, operators and occupants of the Property (if any), and state or local government officials. Section 7.0 of this report contains the results of our interviews and a review of any information provided to us. Information provided by the user is discussed in Section 4 and interview documentation is in Appendix E.
- This report was prepared to document the results of our inquiry as well as our findings, opinions, and conclusions. The appendices contain figures, photographs, and other various supporting documentation.

2.3 Significant Assumptions

Unless indicated otherwise herein, we assume that the user of this report seeks to qualify for one of the LLPs to CERCLA liability. However, the completion of this assessment alone may not be sufficient to qualify the user for an LLP. For such a determination, legal counsel may be needed.

We have not tried to independently verify the information provided by the parties interviewed or information gathered from other sources in the process of this assessment. Unless we had reasons to suspect the accuracy of information gathered, we have relied on the information as true, accurate, and complete.

2.4 Limitations and Exceptions

In accordance with ASTM E 1527, ECA's scope of work did not include addressing the following "non-scope considerations": asbestos-containing materials, lead-containing coatings, endangered species, indoor air quality, radon, and mold, among other items. Unless specifically addressed herein, one should not assume that such items were included in our scope of work. The site was inspected for obvious visual evidence of wetlands and the flood potential of the Property was evaluated, even though normally considered "non-scope considerations".

ECA performed no subsurface investigation as part of this assessment and removed no on-site vegetation. Therefore, it is possible that evidence of regulated substances or special resources not encountered during our site inspection, exists below grade or beneath vegetation which covers portions of the Property.

This report does not purport to be representative of future site conditions or events. Situations or activities which occur subsequent to this work and which result in adverse environmental conditions are not to be construed as relevant to this study.

During the site visit, ECA visually and physically observed the Property and any structures on the Property to the extent not obstructed by bodies of water, adjacent buildings, or other obstacles and in conformance with Section 9 of ASTM Practice E 1527-05.

2.5 Special Terms and Conditions

This assessment was performed in accordance with generally accepted methods and practices of the profession. All conclusions are based on "reasonably ascertainable" information and are not to be considered scientific certainties. The intent of this study was to identify environmental concerns that would be obvious to an environmental professional exercising due diligence and is not intended to represent an exhaustive research of all potential hazards that may exist.

2.6 User Reliance

This study and report have been prepared on behalf of and for the exclusive use of PM&A and Municipal Communications, LLC (user), solely for their use and reliance in the environmental assessment of the Property. The report is considered Proprietary Information and the findings contained herein shall not, in whole or in part, be disseminated or conveyed to any other party, nor used or relied upon by any other party, without written notification from PM&A to ECA. In that case, ECA will issue a letter of understanding to the third party for their signature and will provide a copy of this report to the third party as directed by PM&A for a processing fee. Notwithstanding, anything to the contrary herein, any third party reliance is limited to the agreed upon scope of work by and between ECA and PM&A.

3.0 SITE DESCRIPTION

3.1 Location and Legal Description

As shown in Figure 1 of Appendix A, the Property is located at 300 Howard Road, Senoia, Coweta County, Georgia. The Property measures 100-feet by 100-feet and is accessible by public right-of-way off the parking lot of Senoia Senior Center located at 300 Howard Road. The approximate latitude and longitude of the Property (center) are as follows:

Latitude: 33° 18' 13.9" N
Longitude: 84° 34' 13.2" W

A Site Plan of the Property is presented in Figure 2 of Appendix A. A legal description of the Property was not provided.

3.2 Site and Vicinity General Characteristics

The Property is located near the city park and maintenance facilities just west of the City of Senoia. The area is characterized by significant wooded land with some recreational and industrial development to the east and residential development to the south. The ground surface in the area of the Property appears to slope down to the south.

3.3 Current Use of the Property

The Property is currently undeveloped and wooded.

3.4 Descriptions of Structures, Roads, and Improvements on the Property

The Property is undeveloped, wooded land and no improvements currently exist.

3.5 Current Use of Adjoining Properties

The adjoining properties are wooded. An unpaved road is located just north of the Property and traverses in an east to west direction. This property is owned by the City of Senoia and the adjoining property to the north, across the unpaved road, is used as a wastewater spray field. Vicinity and adjoining properties are indicated on Figure 2 in Appendix A.

4.0 USER PROVIDED INFORMATION

We understand that Municipal Communications, LLC is considering a lease of the Property and that it will be developed for a telecommunications facility. ECA was retained to provide this Phase I Environmental Site Assessment to identify recognized environmental conditions on the Property prior to the real estate transaction.

In accordance with Section 6 (User's Responsibilities) of ASTM E1527, the user is to conduct certain tasks and provide certain information regarding potential recognized environmental conditions on the Property. Failure to provide certain information to ECA could affect our ability to identify recognized environmental conditions and failure to perform certain tasks could jeopardize the user's qualification for LLP to CERCLA liability. Two of the tasks that the user should perform include a review of title and judicial records for environmental liens or activity and use limitations.

4.1 Title Records

We have not been provided with a chain-of-title for the Property. However, we will review such if provided to us. We may have been informed of, or discovered through interviews, general information regarding prior ownership of the Property. If so, such information is discussed in Sections 5.4 and 7. However, this should not be construed to be a title search as normally conducted by a title professional.

4.2 Environmental Liens or Activity and Use Limitations

We assume that the user has or will determine that no environmental liens or activity and use limitations (AULs) exist on the Property. Research for such liens or AULs is normally conducted by a title professional. Should any such liens or limitations exist, the user should provide this information.

4.3 Specialized Knowledge

We have solicited available information concerning the Property and the pending transaction from the user. Any provided information is discussed herein as appropriate. We were provided the Property address and/or coordinates, current owner contact, and other general site information.

4.4 Commonly Known or Reasonably Ascertainable Information

The user did not provide other information not presented herein, as commonly known in the community or reasonably ascertainable regarding the Property, with regard to potential recognized environmental conditions.

4.5 Valuation Reduction for Environmental Issues

We assume that there has been no reduction in the value of the Property below the fair market value. If there has been a reduction, the user should consider this in light of the information reported herein, try to identify an explanation for the reduction, and document this evaluation.

4.6 Owner, Property Manager, and Occupant Information

The following parties were identified to ECA in connection with this assessment. As appropriate, we have interviewed each, the results of which are discussed in Section 7.0 and documented in Appendix E.

Owner: City of Senoia
Property Manager: Richard Ferry, City Administrator
Occupant(s): Not applicable

4.7 Reason for Performing Phase I

As discussed above, we assume that the user has requested this assessment to qualify for a landowner liability protection (LLP) to CERCLA liability. However, there may be other business-related reasons for requesting this assessment, such as company policy, that have not been identified to ECA and have not been addressed herein.

4.8 Other

No other information regarding the Property was provided by the user.

5.0 RECORDS REVIEW

5.1 Standard Environmental Record Sources

Environmental Data Resources, Inc. (EDR) was retained to provide a database search of the applicable sources, as required by the ASTM standard. Federal, state, local, and tribal environmental databases were reviewed to obtain information that might identify recognized environmental conditions in connection with the Property. Regulated facilities appearing within ASTM standard distances of the Property are listed and plotted on a color map of the Property vicinity which, along with information obtained from the various regulatory databases, is included on the EDR report in Appendix D.

Sources	ASTM Distances
Federal NPL, State or Tribal-equivalent Hazardous Sites	1.0 Mile
Federal Delisted NPL Sites	0.5 Mile
Federal CERCLIS, State or Tribal-equivalent Sites	0.5 Mile
Federal RCRA CORRACTS Sites	1.0 Mile
Federal RCRA Non-CORRACTS Hazardous Waste Treatment, Storage, and/or Disposal (TSD) Facilities	0.5 Mile
State or Tribal Listed Landfills and/or Solid Waste Disposal Sites	0.5 Mile
State or Tribal Leaking Underground Storage Tanks (LUSTs)	0.5 Mile
State or Tribal Brownfield Sites	0.5 Mile
State or Tribal Voluntary Cleanup Sites	0.5 Mile
Federal RCRA Hazardous Waste Generators	Property & Adjoining
State or Tribal Registered Storage Tanks	Property & Adjoining

Federal, State, or Tribal Institutional Controls/Engineering Control Registries	Property & Adjoining
Federal ERNS Listed Facilities	Property Only
All Other Regulated Facilities	Property & Adjoining

The Property did not appear as a regulated site on the databases reviewed. No regulated facilities appeared on the databases searched that are located within standard ASTM distances of the Property. However, ECA requested EDR to do an OnDemand search for two nearby facilities, Winpak Films and Southern Mills, and found them listed on several environmental databases that are located within the ASTM search distances.

The Winpak Films facility is about 1,200 feet to the east and topographically up-gradient from the Property. According to their website, they manufacture and distribute high-quality packaging materials and related packaging machines. This facility is listed on the RCRA hazardous waste generator (small quantity generator) and the Facility Index System/Facility Registry System (FINDS) databases for air emissions. Hazardous wastes generated at this facility include benzene and tetrachloroethylene. There is one RCRA violation on record reported in March of 2008 coded as "Container Use and Management" and multiple OSHA violations. ECA does not have any further details. ECA found no evidence of a release from this facility and do not consider these listings a recognized environmental condition to the Property.

The Southern Mills facility (textile company) is located about 2,300 feet to the southeast and topographically cross gradient to the Property. This facility is listed on the Spills Information (SPILLS); Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS); and above ground storage tank (AST) databases. ECA contacted the EPD regarding a CERCLIS, or Superfund, reference in the EDR report. The records show that this site was listed as a Superfund site in the 1980s but was delisted in 2001 based on the information collected during assessments. Yue Han, the Compliance Officer, for the Superfund listing provided laboratory results from samples taken in 2005. The samples of groundwater showed evidence of acetone, dichloro-benzene, dichloroethene, trichloro-ethene, vinyl chloride, methylene chloride, chloroform, and carbon disulfide in the groundwater at this nearby facility.

ECA believes that based on the area topography and distance, this known release at the facility would not be considered a recognized environmental condition to the Property. However, ECA understands that Southern Mills was the owner and developer of the wastewater spray fields adjacent and to the north of the Property. ECA understands that Southern Mills used these spray fields for about ten years before the City of Senoia purchased the tract about twelve years ago. Given this known relation between Southern Mills and the Property, this facility represents a recognized environmental condition to the Property.

Sometimes facilities are identified that can not be mapped based on the addresses contained within the databases (called orphan or unmappable sites). These sites were reviewed in an attempt to identify their locations. We found Senoia City Park listed on the FINDS database for air emissions only. We discovered no other listings and do not consider this a recognized environmental condition to the Property.

5.2 Additional Environmental Record Sources

Mr. Jay Jones, the Director of Coweta County Emergency Management, was contacted to discover any evidence of recognized environmental conditions in connection with the Property. He did not provide any information that would indicate a recognized environmental condition on the Property.

5.3 Physical Setting Source(s)

5.3.1 Property Topography and Hydrology

The Property is located as shown on Figure 1 in Appendix A. Figure 1 is taken from the Senoia, Georgia USGS Topographic Quadrangle Map, 7.5 minute series (1965, photorevised 1982).

The topography of the Property vicinity is characterized by a general slope down to the south. Surface water in the area appears to drain toward an intermittent stream about 300 feet to the southwest.

5.3.2 Property Geology and Soil Conditions

Geologically, the Property is located within the Piedmont Physiographic Province, which is characterized by igneous and metamorphic rocks such as gneisses, schists, and granites. In the Piedmont, groundwater is generally present in the overlying mantle of residual soil or in joints and cracks present in the underlying rock. Typically, the water table forms a subdued reflection of the land surface. Based on our site visit and the USGS map, surface water at the Property appears to flow to the south. Therefore, groundwater probably also flows in this general direction. However, groundwater flow direction cannot be accurately determined unless a detailed subsurface investigation is performed.

According to the USDA Web Soil Survey, soils found at the Property are Madison gravelly sandy loam (MdC). These soil types are well drained soils typically found on upland areas.

5.3.3 Flooding and Wetland Potential

The Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) Panel 13077C0287C, dated May 16, 2006, indicates the Property is not located within a Special Flood Hazard Area of the 100-year floodplain.

At the federal level, the U.S. Army Corps of Engineers (USACE) has been given primary responsibility for regulating jurisdictional waters and wetlands. For the USACE to have jurisdiction over wetlands, certain wetland characteristics must be present. The delineation of possible wetlands was not within the scope of this assessment. Based on the research performed and our November 4, 2010 site visit, it does not appear that jurisdictional waters or wetlands would be impacted by the proposed facility. However, the existing portion of the proposed access route crosses an apparent perennial or intermittent stream. In Coweta County, a minimum

25-foot buffer with an additional 25-foot impervious restriction zone would be applicable for any construction. This requirement should be verified as part of the zoning and permitting process. The subject property is not mapped within a Coweta County designated Water Supply Watershed Protection District which would require an extended buffer zone for construction activity (Attachment G). The appropriate buffers, if any are applicable, should be confirmed with the local jurisdiction as part of the building permit process. ECA also believes that wetlands are located to the east of the Property, just south of the existing gravel access road and just west of the proposed access road.

5.4 Historical Use Information on the Property

Per the ASTM standard, “all obvious uses of the property shall be identified from the present, back to the property’s first developed use, or back to 1940, whichever is earlier.” We have researched the following sources of information to determine the historical uses and activities at the subject Property and surrounding properties:

- Richard Ferry, a representative for the City of Senoia, the representative for the parent tract owner, was interviewed (also see Section 7.0), to obtain his personal knowledge of the historical use of the Property.
- A historic USGS topographic map dated in 1965 and photorevised in 1982 was reviewed for the Property area.
- Historic aerial photographs made in 1942, 1949, 1958, 1965, 1971, 1993, 1999, 2004, 2007, and 2008 were reviewed for the Property area.

Based on the information reviewed as well as the interviews discussed previously, the Property has been wooded since the 1970s and historically used agriculturally and this seems to be evident in the historical resources reviewed. The 1942 through 1965 aerial photographs show the Property as agricultural land and the later 1971 through 2009 aerial photographs show the Property as woodland. Mr. Richard Ferry, the City Administrator, confirmed that the Property was wooded when they purchased it about 12 years ago.

We were not able to identify the historical uses of the Property before about 1942. Therefore, a *data failure* exists, as defined in ASTM E1527. However, the *data failure* does not represent a significant *data gap*. As allowed in ASTM E1527, there is no “reasonable concern” about the prior historical use since the earliest source dated 1942 indicates the Property as agricultural land and there are no other indications that it was developed otherwise prior to that date.

5.5 Historical Use Information on Adjoining Property

The Property is located on a larger tract of land owned by the City of Senoia and is currently wooded. The City of Senoia also owns larger tracts to the north across an unpaved road and to the west. The two tracts south of the unpaved road are currently wooded. The larger tract across the unpaved road to the north is currently wooded, with the exception of a small cleared area

adjacent to the road. The land to the north of the Property is used as a wastewater sprayfield. According to Mr. Richard Ferry, the City of Senoia purchased the tract to the north about twelve years ago from Southern Mills. Mr. Ferry believed that Southern Mills developed it about ten years prior to the city's purchase. The Southern Mills facility is located approximately 2,300 feet to the southeast and topographically cross gradient to the Property. The Southern Mills facility was listed as a CERCLIS, or Superfund site, in the 1980s and was delisted in 2001. Due to known chemical uses and releases at the facility, it is possible that contaminated wastewater may have impacted the Property. A Phase II Environmental Assessment is concurrently being conducted. Results will be reported separately. See Section 5.1 for a further discussion.

6.0 SITE RECONNAISSANCE

6.1 Methodology and Limiting Conditions

The objective of our visit was to obtain information, by visually and physically observing the Property, which could likely lead to the identification of recognized environmental conditions in connection with the Property. The site reconnaissance was performed by Marvin Webster on November 4, 2010.

Photographs were taken of noteworthy areas of the Property and vicinity and are included in Appendix B. The locations where the photographer was standing and the directions the photographer was facing are indicated with letters and arrows on Figure 2 in Appendix A. The letters correspond to those used to label the photographs in Appendix B.

6.2 General Site Setting

6.2.1 Current and Past Uses of the Property

The current use of the Property is undeveloped, wooded land. Historically, the Property was part of an agricultural field. The unpaved road north of the Property was constructed sometime between 1999 and 2004 and will be used to access the Property.

Photographs A through D are respective northerly, easterly, southerly, and westerly views from near the center of the Property.

Photographs E and F are respective easterly and westerly views along the unpaved road just north of the Property.

Photograph G is a northerly view of the proposed access road from the asphalt parking area of the City Senior Center.

6.2.2 Current and Past Uses of Adjoining Property

We attempted to observe conditions on the adjoining properties. Our vantage points were generally limited to the Property and public right-of-ways. The adjoining properties are wooded. The area across the unpaved road to the north is wooded and used as a wastewater spray field. The identified current or past uses of the adjoining properties are discussed in Section 5.5.

6.2.3 Current and Past Uses of Surrounding Area

The obvious uses of surrounding properties considered potential environmental concerns include the city maintenance/shop area located about 850 feet topographically up-gradient of the subject Property, the WinPak Films facility located about 1,200 feet to the east and topographically up-gradient to the Property, and the Southern Mills facility located about 2,300 feet to the southeast and topographically cross gradient to the Property. Both the WinPak Films and Southern Mills facilities are discussed above in Sections 5.1 and 5.5. As for the nearby maintenance/shop area, ECA observed above ground storage tanks (AST) with an apparent fuel dispenser, a portable welder, and other miscellaneous stored equipment. We assume some of the ASTs are currently in use and we did observe surface staining within this area. In general this area was untidy. However, based on the distance and topography we do not believe any release within this area would be an environmental concern to the Property. We were only able to observe the general use of the surrounding properties and therefore, there could be environmental conditions that we did not discover.

Photograph H is a southerly view of a debris pile containing wood, concrete, brick, and landscape wastes within the area of the proposed access road. Many such piles were observed to the east of the Property along the existing access road.

Photograph I is a northeasterly view showing the city maintenance/shop area.

Photograph J is a view of an above ground tank, apparent fuel dispenser, and portable welder stored at the maintenance/shop area with obvious surface staining.

6.3 Exterior Observations

The Property is undeveloped, wooded land. The topography includes a general slope to the south. Access to the Property is from the asphalt parking area of the City Senior Center. The proposed access road would initially traverse in a northerly direction through a wooded area for approximately 400 feet before turning west to join an existing unpaved road to the Property. ECA observed miscellaneous debris along the unpaved road to the Property which included wood, concrete, landscape wastes, and brick. A monitoring well was also observed within this area. We did not find any trash that would be an environmental concern to the Property.

6.4 Interior Observations

There are no structures on the Property; therefore, we had no interior observations.

7.0 INTERVIEWS

We interviewed the following parties to determine if they had any specialized knowledge of the Property that might indicate recognized environmental conditions. Our interviews are documented in Appendix E.

7.1 Interview with Owner

We interviewed Mr. Richard Ferry, the City Administrator, by phone after the site visit. He did not provide any information that would indicate a recognized environmental condition on the Property. See Appendix E for the detailed interview.

7.2 Interview with Site Manager

Since the Property is wooded land and not occupied, there is no site manager other than the current owner as above.

7.3 Interviews with Occupants

Since the Property is wooded land and not occupied, there are no occupants.

7.4 Interviews with Local Government Officials

Mr. Jay Jones, the Director of Coweta County Emergency Management, was contacted to discover any evidence of recognized environmental conditions in connection with the Property. He did not provide any information that would indicate a recognized environmental condition on the Property.

7.5 Interviews with Others

We contacted Mr. Yue Han of the EPD to solicit information pertaining to the Southern Mills facility. Mr. Han provided groundwater and soil test results and a site diagram of the monitoring wells. See Appendix D.

8.0 FINDINGS

We discovered that the property to the north is used as a wastewater spray field that was developed by Southern Mills. Southern Mills is listed on several environmental databases and has known releases of acetone, dichloro-benzene, dichloroethene, trichloro-ethene, vinyl chloride, methylene chloride, chloroform, and carbon disulfide in the groundwater.

9.0 OPINION

Based on the known relationship between Southern Mills and the adjacent spray fields, it is possible that contaminated wastewater could have entered the wastewater system and impacted the Property. We consider this a recognized environmental condition to the Property. A Phase II Environmental Site Assessment is concurrently being conducted and results will be reported separately.

10.0 CONCLUSIONS

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527 of the Property located at 300 Howard Road, Senoia, Coweta County, Georgia. Any exceptions to, or deletions from, this practice are described in Section 2.4 of this report. This assessment has revealed a recognized environmental condition in connection with the Property. A Phase II Environmental Site Assessment is concurrently being conducted and results will be reported separately.

11.0 DEVIATIONS

We have not deviated from or deleted any requirements of the ASTM E1527-05 standard. Also, we were under no client-imposed constraints and there were no special contractual conditions or modifications to the ASTM E1527-05 scope of services requested by the user.

12.0 ADDITIONAL SERVICES

No other additional services were requested by the user.

13.0 REFERENCES

Selected documents that have been referred to in this report are provided in the Appendices, as appropriate. Any other documents or information used in this assessment are retained in ECA's project files.

14.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

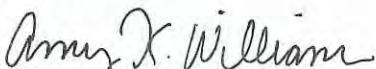

The environmental professional for this assessment was Marvin Webster. Mr. Webster conducted the site reconnaissance and the person conducting the interviews and authoring this report was Amy K. Williams.

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental professional as defined in §312.10 of 40 CFR 312.

Marvin Webster, REP
Principal Scientist

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject Property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Amy K. Williams
Senior Scientist

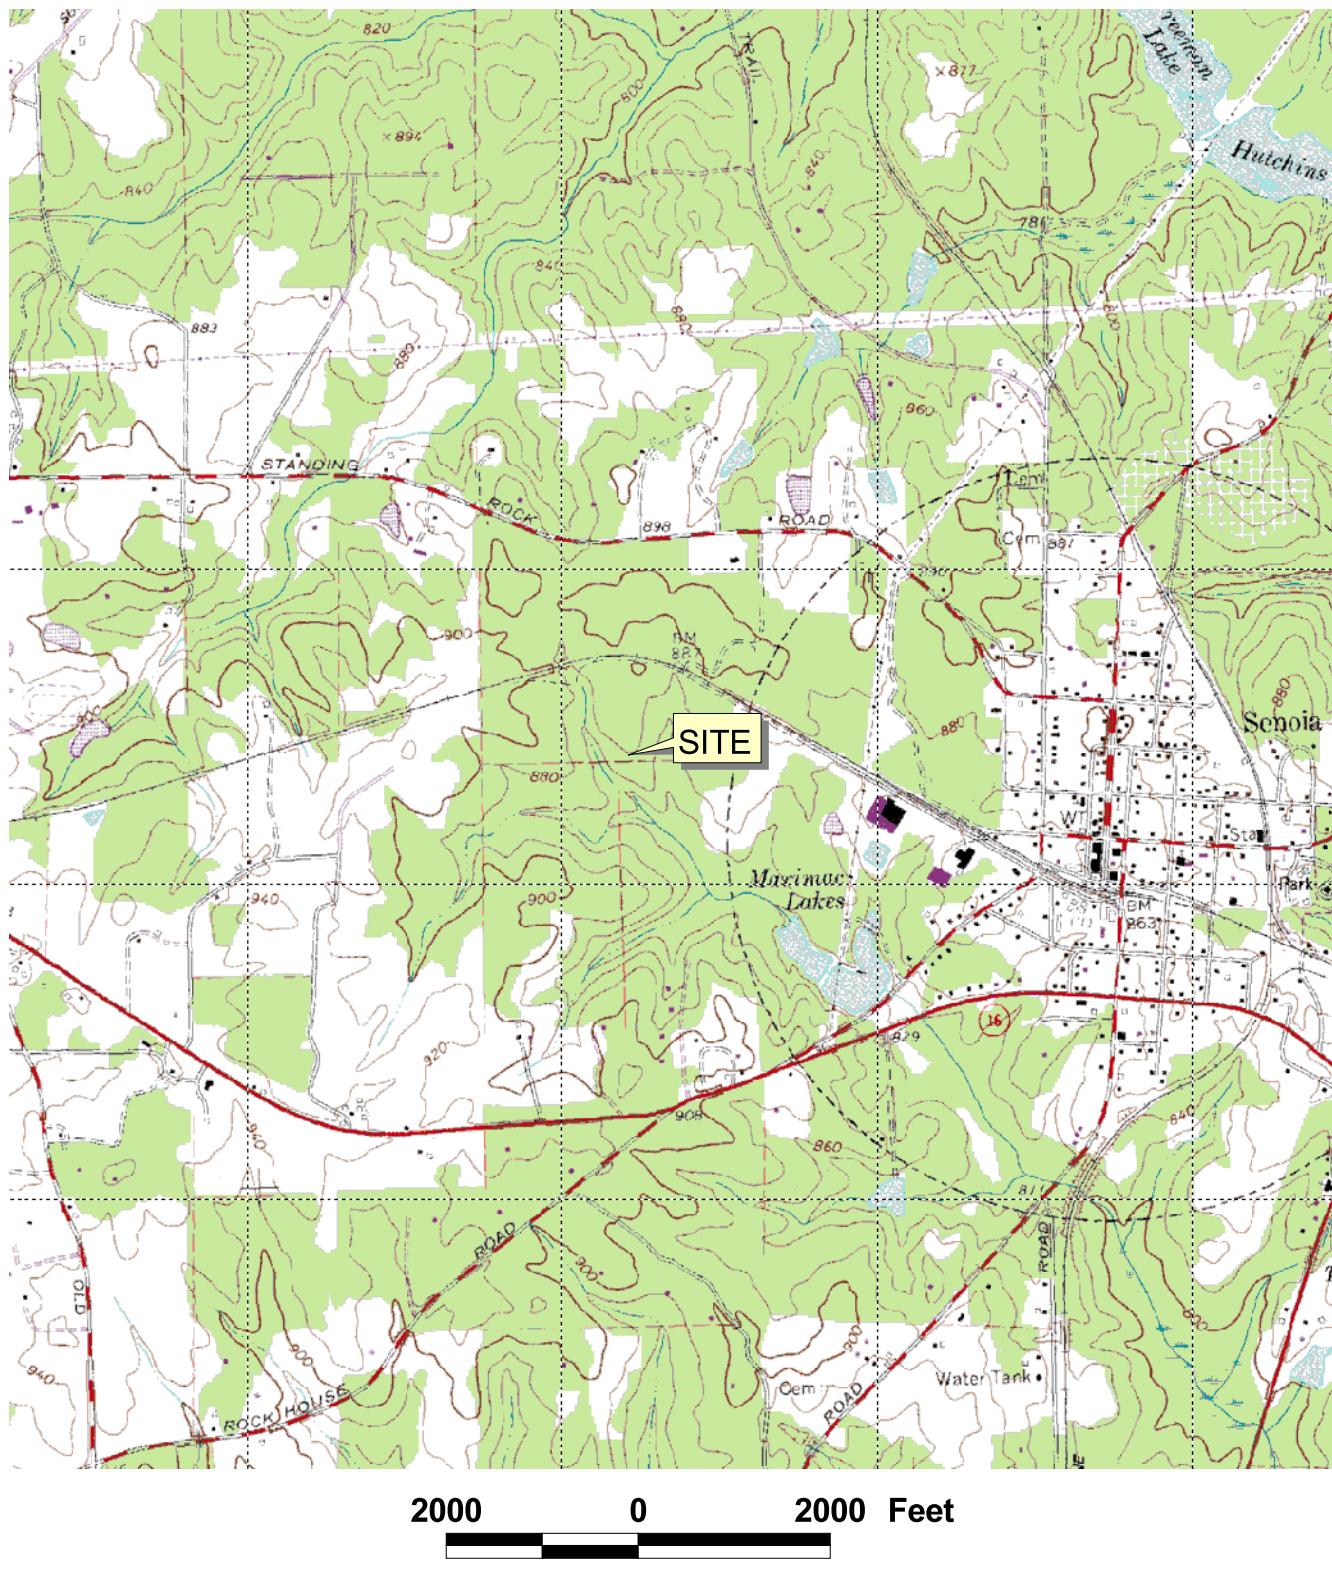

Marvin Webster, REP
Principal Scientist

15.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

ECA utilizes only personnel experienced in performing Environmental Site Assessments for work of this kind. A senior project principal oversees the execution of the work and reviews and signs all reports. Résumés of the environmental professionals signing this report are available upon request.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

State- and tribal - equivalent CERCLIS

GA NON-HSI: Georgia Non Hazardous Site Inventory Sites.

A review of the GA NON-HSI list, as provided by EDR, and dated 06/30/2010 has revealed that there is 1 GA NON-HSI site within approximately 1 mile of the target property.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

EPA Region 10 Telephone 206-553-8665	

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

NON HSI: Non-Hazardous Site Inventory

This list was obtained by EDR in 1998 and contains property listings that have reported contamination of soil or groundwater under the Georgia Hazardous Site Response Act (HSRA). These sites were not placed on the Georgia Priority list (Hazardous Site Inventory or HSI) because their hazard evaluation scores did not exceed the threshold levels established for sites posing an imminent threat to health or the environment. Disclaimer provided by Rindt-McDuff Associates - the database information has been obtained from publicly available sources produced by other entities. While reasonable steps have been taken to insure the accuracy of the data, RMA does not guarantee the accuracy of the data. No claim is made for the actual existence of pollution at any site. This data does not constitute a legal opinion.

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.
Telephone: (281) 769-2247
U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Child Care Centers

Source: Department of Human Resources

Telephone: 404-651-5562

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

EDR Site Report™

TABLE OF CONTENTS

The EDR-Site Report™ is a comprehensive presentation of government filings on a facility identified in a search of federal, state and local environmental databases. The report is divided into three sections:

Section 1: Facility Summary **Page 3**

Summary of facility filings including a review of the following areas: waste management, waste disposal, multi-media issues, and Superfund liability.

Section 2: Facility Detail Reports **Page 4**

All available detailed information from databases where sites are identified.

Section 3: Databases and Update Information..... **Page 5**

Name, source, update dates, contact phone number and description of each of the databases for this report.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

SECTION 1: FACILITY SUMMARY

FACILITY AREA	FACILITY 1 SENOIA CITY PARK NOT GIVEN SENOIA, GA 00000 EDR ID #1005495742 EPA #110010339703
WASTE MANAGEMENT Facility generates hazardous waste (RCRA)	NO
Facility treats, stores, or disposes of hazardous waste on-site (RCRA/TSDF)	NO
Facility has received Notices of Violations (RCRA/VIOL)	NO
Facility has been subject to RCRA administrative actions (RAATS)	NO
Facility has been subject to corrective actions (CORRACTS)	NO
Facility handles PCBs (PADS)	NO
Facility uses radioactive materials (MLTS)	NO
Facility manages registered aboveground storage tanks (AST)	NO
Facility manages registered underground storage tanks (UST)	NO
Facility has reported leaking underground storage tank incidents (LUST)	NO
Facility has reported emergency releases to the soil (ERNS)	NO
Facility has reported hazardous material incidents to DOT (HMIRS)	NO
WASTE DISPOSAL Facility is a Superfund Site (NPL)	NO
Facility has a known or suspect abandoned, inactive or uncontrolled hazardous waste site (CERCLIS)	NO
Facility has a reported Superfund Lien on it (LIENS)	NO
Facility is listed as a state hazardous waste site (SHWS)	NO
Facility has disposed of solid waste on-site (SWF/LF)	NO
MULTIMEDIA Facility uses toxic chemicals and has notified EPA under SARA Title III, Section 313 (TRIS)	NO
Facility produces pesticides and has notified EPA under Section 7 of FIFRA (SSTS)	NO
Facility manufactures or imports toxic chemicals on the TSCA list (TSCA)	NO
Facility has inspections under FIFRA, TSCA or EPCRA (FTTS)	NO
Facility is listed in EPA's index system (FINDS)	YES - p4
Facility is listed in a county/local unique database (LOCAL)	NO
POTENTIAL SUPERFUND LIABILITY Facility has a list of potentially responsible parties PRP	NO
TOTAL (YES)	1

Indian Tribal Land: No

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

Prg. Sys. ID: 1322589999

Supplemental Interest: Not reported

Facility SIC Codes: 7033

Facility NAICS Codes: 721211

Alternative name: SENOIA CITY PARK

SECTION 3: DATABASES AND UPDATE DATES

To maintain currency of the following federal, state and local databases, EDR contacts the appropriate government agency on a monthly or quarterly basis as required.

Elapsed ASTM days: Provides confirmation that this report meets or exceeds the 90-day updating requirement of the ASTM standard.

DATABASES FOUND IN THIS REPORT

FINDS: Facility Index System/Facility Registry System

Source: EPA

Telephone: Not reported

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	Unknown
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No
Off-site waste receiver:	Verified to be non-commercial

Hazardous Waste Summary:

Waste code:	U004
Waste name:	ACETOPHENONE
Waste code:	U123
Waste name:	FORMIC ACID (C,T)
Waste code:	U239
Waste name:	BENZENE, DIMETHYL- (I,T)
Violation Status:	No violations found

Evaluation Action Summary:

Evaluation date:	07/03/1986
Evaluation:	NON-FINANCIAL RECORD REVIEW
Area of violation:	Not Reported
Date achieved compliance:	Not Reported
Evaluation lead agency:	State

FINDS:

Registry ID: 110001419910

DETAILS

SOUTHERN MILLS INC SENOIA DIVISION, 74 ANDREWS PKWY SENOIA, GA 30276 (Continued)

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

DATABASE DESCRIPTIONS

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Source: EPA

Date of Government Version: 01/29/2010

Telephone: 703-412-9810

Database Release Frequency: Quarterly

RCRA-NLR: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 02/17/2010

Telephone: 703-308-0035

Database Release Frequency: Varies

FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Telephone:

Database Release Frequency: Quarterly

AST: Above Ground Storage Tanks

A listing of LP gas tank site locations.

Source: Office of Insurance & Safety Fire Commissioner

Date of Government Version: 07/30/2010

Telephone: 404-656-5875

Database Release Frequency: Varies

SPILLS: Spills Information

Oil or Hazardous Material Spills or Releases.

Source: Department of Natural Resources

Date of Government Version: 10/18/2010

Telephone: 404-656-6905

Database Release Frequency: Quarterly

PCS: Permit Compliance System

PCS is EPA's database system for managing wastewater discharges to surface bodies of water as part of the National Pollutant Discharge Elimination System under the Clean Water Act. Facility data, discharge monitoring report information and compliance/enforcement activities are included in the database. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 05/01/2008

Telephone: 404-362-2680

Database Release Frequency: Varies

DISCLAIMER, COPYRIGHT AND TRADEMARK NOTICE

This is The EDR OnDemand Report. Through its continuing emphasis in online technological advancements, EDR has developed the OnDemand system, which enables EDR's customers to search EDR's databases and generate reports based on database records selected by the Client. Client acknowledges that Client has generated this Report by marking those records which Client wishes to include in the final Report. Client has not requested that EDR provide any advice, recommendation or guidance on which records to include in the final Report, and EDR had provided no such advice, recommendation or guidance. The decision of which records to include in the final Report is solely that of Client. EDR has done no checking or quality control of any of the records included in this Report or of this Report itself.

This report contains information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.**

Purchaser accepts this report "AS IS". Any analyses, estimates, ratings, or risk codes provided in this report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can produce information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

▼ FINDS: Facility Index System/Facility Registry System

FINDS:

Registry ID: 110032649677

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Classification:	Small Quantity Generator

Hazardous Waste Summary:

Waste code:	D001
Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Waste code:	D018

DATABASE DESCRIPTIONS

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 02/17/2010
Database Release Frequency: Quarterly

FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Telephone: 202-693-1700

Date of Government Version: 12/31/2007
Database Release Frequency: Annually

AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

General plant level, plant air program, air program pollutant and plant action data.

Source: EPA
Telephone: 800-367-1044

Date of Government Version: 02/16/2010
Database Release Frequency: Annually

DISCLAIMER, COPYRIGHT AND TRADEMARK NOTICE

This is The EDR OnDemand Report. Through its continuing emphasis in online technological advancements, EDR has developed the OnDemand system, which enables EDR's customers to search EDR's databases and generate reports based on database records selected by the Client. Client acknowledges that Client has generated this Report by marking those records which Client wishes to include in the final Report. Client has not requested that EDR provide any advice, recommendation or guidance on which records to include in the final Report, and EDR had provided no such advice, recommendation or guidance. The decision of which records to include in the final Report is solely that of Client. EDR has done no checking or quality control of any of the records included in this Report or of this Report itself.

This report contains information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OR DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.**

Purchaser accepts this report "AS IS". Any analyses, estimates, ratings, or risk codes provided in this report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can produce information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

APPENDIX E

INTERVIEW DOCUMENTATION

INTERVIEW DOCUMENTATION

INTERVIEWER: Amy Williams

DATE OF INTERVIEW: 11/17/2010

BY PHONE **IN PERSON**

NAME: Richard Ferry

TITLE/JOB: City Administrator

AFFILIATION: City of Senoia

ADDRESS:

TELEPHONE: 770-599-3679

REMARKS:

Mr. Ferry reported that the City of Senoia purchased the approximate 100 acre parent tract approximately 12 years ago from Southern Mills. Southern Mills is a textile company where the main building of operations is about 2,300 feet east-southeast of the Property. At the time of purchase the Property was already developed as a wastewater spray field and is currently used as such today by the city. Mr. Ferry understands that the fields were developed by Southern Mills about 10 years prior to the city's purchase. The City of Senoia did expand operations to handle the city sewage capacity. Mr. Ferry is unaware of any environmental concerns relating to the Southern Mills facility. He indirectly heard of abnormal coloration in the creek near the facility but that was within an area about 2,000 feet southeast of the Property and he did not actually see any data or reports of this matter.

The City of Senoia performs regulatory testing required by the EPD. The city tests five in place monitoring wells placed throughout the spray fields and also from a nearby stream. They test for pH, electrical conductivity, nitrate, dissolved oxygen, and fecal coliform.

Mr. Ferry reported that the area to the east is used as the city park and developed with baseball fields, a maintenance/shop building, and the senior center. He is unaware of any releases from any of these operations.

INTERVIEW DOCUMENTATION

INTERVIEWER: *Amy Williams*

DATE OF INTERVIEW: *11/16/2010*

BY PHONE **IN PERSON**

NAME: *Jay Jones*

TITLE/JOB: *EMS Director*

AFFILIATION: *City of Senoia*

ADDRESS:

TELEPHONE: *678-229-8523*

REMARKS:

Mr. Jones reported that he has worked with the city since 1987 (23 years) and is unaware of any responses to this Property or adjacent properties.
