Attention: **Mr. Matt Chastain**

Subject: **FCC NEPA Environmental Checklist Addendum**
Proposed 340-Foot Self-Supporting Lattice Communications Structure
(350-Feet Overall Height with Appurtenances)
Senoia
300 Howard Road
Senoia, Coweta County, Georgia
TCNS No. 60893
ECA Project Number: L-568-5

Dear Mr. Chastain:

Environmental Corporation of America (ECA) is pleased to provide this FCC NEPA Environmental Checklist report for the construction of a proposed communications structure. ECA understands that a proposed 350-foot self-supporting lattice antenna structure (overall height) would be constructed within an approximate 100-foot by 100-foot compound. The facility would be accessible from the northwest side of Howard Road. An approximate 400-foot long by 50-foot wide section of proposed access would traverse in a northerly direction from the northern end of the Senoia Senior Center parking lot along the border of a wooded area and would connect to an existing gravel drive that continues in a westerly direction for approximately 650 feet to the location of the proposed fenced compound. The subject site location is shown on Figure 1 of Attachment A.

ECA has used the *FCC Environmental Compliance Checklist* in our evaluation of the undertaking for FCC Environmental Compliance (Attachment B). Where applicable, we have consulted the Agency sources indicated in Attachments A through G.

The subject property is located on property owned by the City of Senoia. The facility would not be located within an officially designated federal wilderness area or wildlife preserve.

The United States Fish and Wildlife Service (FWS) has expressed concerns regarding the proposed tower and its impact on migratory birds. Specifically, while not concerned with federally threatened, endangered, or threatened and endangered proposed species or critical habitat, the FWS has stated concerns that the tower has not been designed to minimize potential impacts towards federally protected migratory birds. To diminish the likelihood of harming migratory birds, the FWS has recommended specific lighting options and has indicated a preference that the tower height not exceed 200 feet. These are only recommendations and not a requirement for the proposed undertaking. See Attachment C for further information pertaining to the FWS recommendations.

The New Tower Submission Packet (FCC Form 620), Section 106 Review Documentation was prepared for the proposed undertaking. The Section 106 Review Documentation found that the proposed tower would not affect Historic Properties (as described in the March 7, 2005 NPA). The Section 106 Review Documentation was submitted to the Georgia Historic Preservation Division (HPD) on March 26, 2010. In a letter dated April 28, 2010, the HPD responded stating that the proposed tower would have No Adverse Effect to Historic Properties (Attachment D).

ECA identified ten federally recognized tribes that may attach religious and cultural significance to Historic Properties within the area of the proposed undertaking. ECA initially contacted the FCC utilizing the Tower Construction Notification System (TCNS) on February 23, 2010 (TCNS ID 60893). Each interested Tribe received initial notification from the FCC by February 26, 2010. All Native American Tribes that have expressed interest within this area have concurred with the project. Documentation of our tribal consultation is included in Attachment E.

If inadvertent discoveries of Native American cultural materials or human remains are made during construction, all work should cease and potentially affected Tribes, as well as the State Historic Preservation Office should be notified immediately. ECA recommends that a statement to this effect be incorporated into the construction plans, drawings, and documents for the facility.

Based on the appropriate FEMA FIRM Panel, the facility would not be located in a Special Flood Hazard Area of the 100-year floodplain (Attachment F).

Based on the research performed and our November 4, 2010 site visit, it does not appear that jurisdictional waters or wetlands would be impacted by the proposed facility (Attachment G). However, the existing portion of the proposed access route crosses an apparent seasonal stream. In Coweta County, a minimum 25-foot buffer with an additional 25-foot impervious restriction zone would be applicable for any construction. The subject property is not mapped within a Coweta County designated Water Supply Watershed Protection District which would require an extended buffer zone for construction activity (Attachment G). The appropriate buffers, if any are applicable, should be confirmed with the local jurisdiction as part of the building permit process.

We understand that high intensity white lights would not be deployed in conjunction with the proposed undertaking. Further, this NEPA Review includes evaluation of impacts or effects relative to RF Exposure. For RF Exposure assessment, ECA relies solely on the project RF Engineers.

In summary, ECA has found no evidence that adverse environmental impacts or effects, as defined in the FCC Rules contained in 47 CFR Sections 1.1301 through 1.1319, will result from the proposed tower construction.

We appreciate this opportunity to provide you with these professional services. If you have any questions regarding this report or the project in general, please call at your convenience.

Sincerely yours,
Environmental Corporation of America

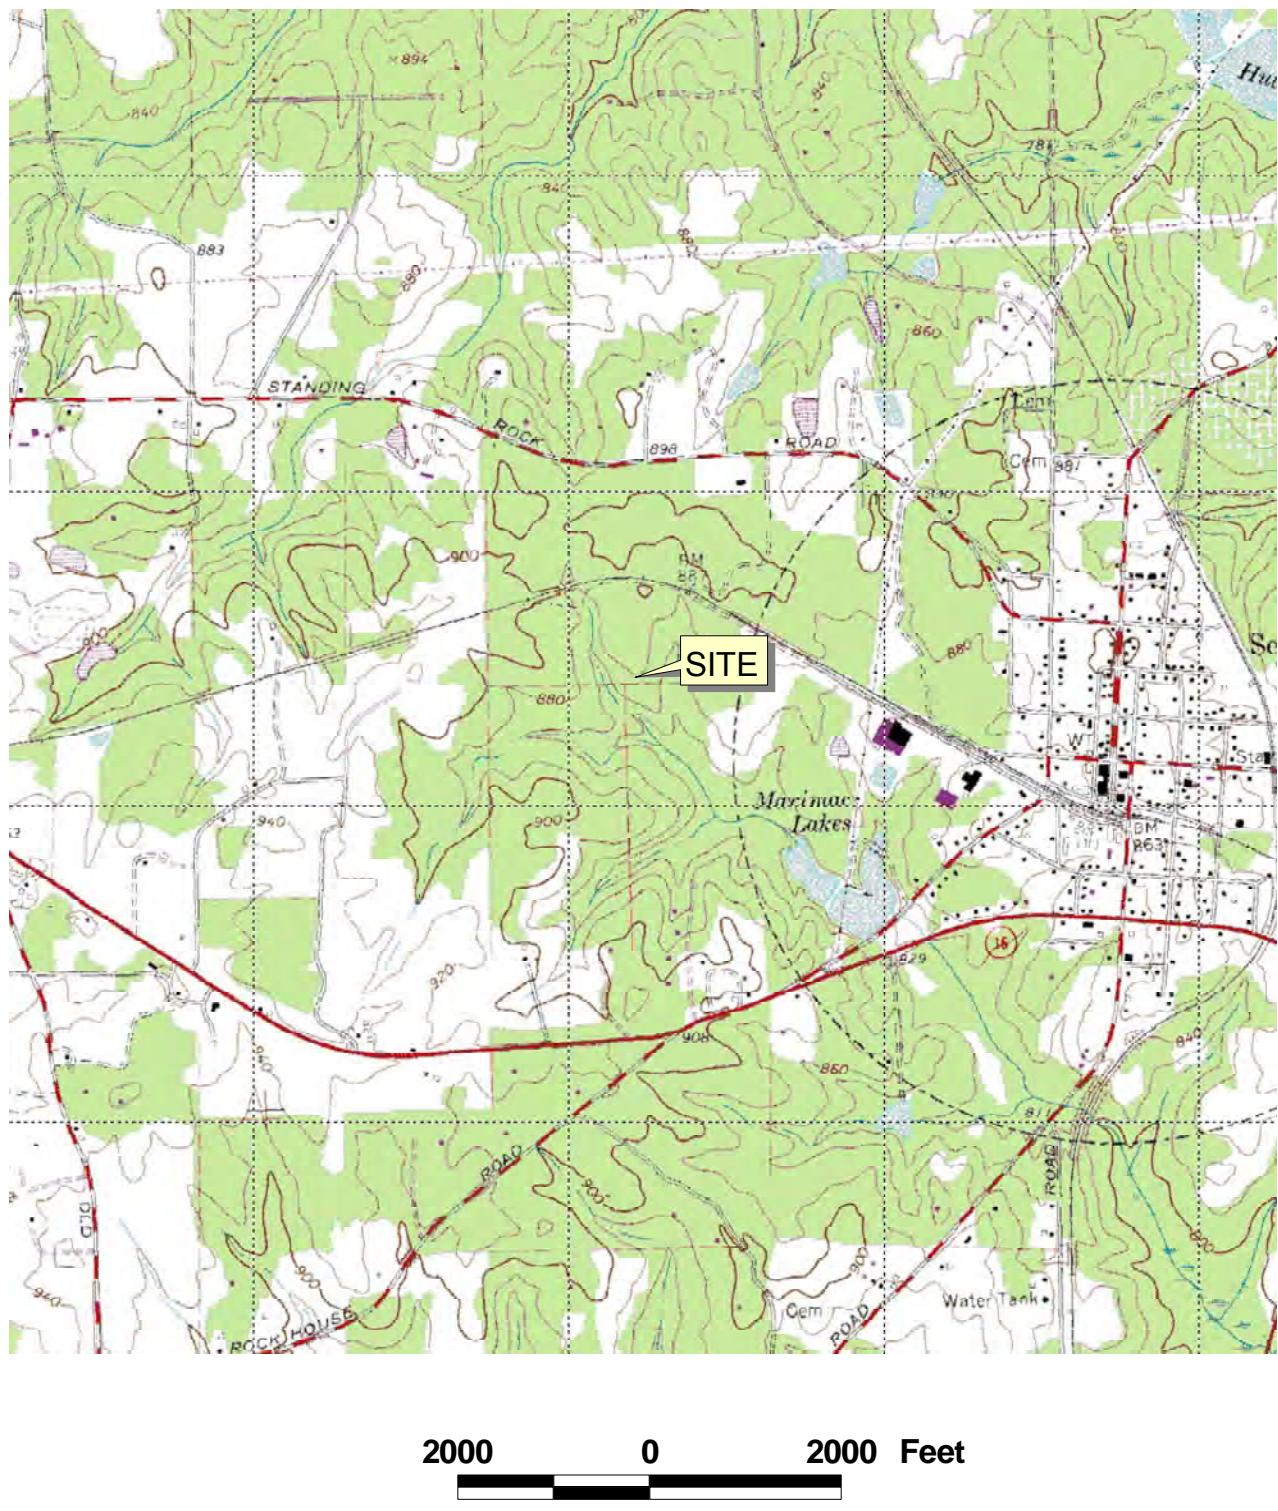

Steve Bernstein
Project Manager

FCC Environmental Compliance Checklist

Site Name: Senoia
ECA Project #: L-568-5

Date: November 18, 2010

YES **NO**

- ____ X 1. Will the facility be located in an officially designated wilderness area?
- ____ X 2. Will the facility be located in an officially designated wildlife preserve?
- ____ X 3. Will the facility affect federally listed, threatened or endangered species or designated critical habitats?
- ____ X 4. Is the facility likely to jeopardize the continued existence of any federally proposed endangered or threatened species or likely to result in the destruction or adverse modification of proposed critical habitats?
- ____ X* 5. Will the facility affect districts, sites, buildings, structures, objects, or other cultural resources listed, or eligible for listing, in the National Register of Historic Places?
* Though Historic Properties would be affected by the proposed undertaking, according to FCC guidance, preparation of an environmental assessment is not required for facilities that affect historic properties listed in or eligible for listing in the National Register of Historic Places unless an adverse effect would occur.
- ____ X 6. Will the facility affect Indian religious sites?
- ____ X 7. Will the facility be located in a 100-year floodplain?
- ____ X 8. Will the construction of the facility involve a significant change in surface features (e.g., wetland fill, deforestation, or water diversion)?
- ____ X 9. Will the antenna or tower and/or supporting structure be equipped with high intensity white lights and be located in or near a residential neighborhood, as defined by the applicable zoning law?
- ____ X 10. Will the proposed facility fall within the categories listed in Table 1 of Section 1.1307(b) and cause exposure of workers or general public to levels of radio-frequency radiation in excess of the limits in Section 1.1310?

IF ALL THE QUESTIONS ABOVE WERE ANSWERED "NO", NO FURTHER ACTION IS REQUIRED FOR FCC ENVIRONMENTAL PURPOSES.

Re: FWS Log No. 2010-CPA-0597

Dear Ms. Morley:

The U.S. Fish and Wildlife Service (Service) has reviewed your request for technical assistance dated March 22, 2010, regarding the construction of a 340-foot tall guyed-type telecommunications structure, located Senoia, Coweta County, Georgia, ECA project number: L-568-2. We submit the following comments under provisions of the Migratory Bird Treaty Act (16 U.S.C. 703, *et seq.*), and the Endangered Species Act of 1973 (Act), as amended (16 U.S.C. 1531, *et seq.*).

We have reviewed the plans for the proposed project. Based on the information you provided, no further action is required under section 7(a)(2) of the Endangered Species Act. However, if new information or changes in the project involve federally listed species, further consultation will be required.

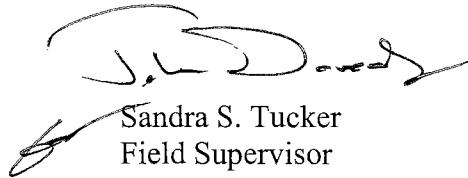

The Service is extremely concerned with the proliferation of communication towers, particularly those taller than 200 feet, and the potential impacts of those structures on migratory birds. For example, night migrating birds, such as warblers, migrate over a broad geographical range and may be negatively impacted by communication towers that display certain types of lighting. Recent estimates indicate that in excess of 4-5 million birds are killed annually as a result of collisions with communication towers.

Most research indicates that neotropical migratory birds fly at least 500 feet above ground level during migration. However, under certain adverse weather conditions, birds often fly at much lower levels and can collide with buildings, water tanks, cellular towers, and other structures within the flight path. Preliminary research indicates that red lights may attract birds to cellular towers during inclement weather. We recommend using white strobe lights with a short flash duration and longer intervals between flashes, both day and night, to reduce impacts to night migrating birds.

These recommendations are meant to inform you of potential Endangered Species Act and Migratory Bird Treaty Act violations that could occur if construction of communication towers result in the "take" of federally listed species or migratory birds. Take is defined as pursuing, hunting, shooting, poisoning, wounding, killing, capturing, trapping, or collecting. In the case of communication towers, take would include death or injury of federally protected species as a result of striking a tower and/or guy wires.

Thank you for the opportunity to provide comments on the proposed project. If you require additional assistance, please contact staff biologist Beau Dudley at our West Georgia Sub Office (706)544-6253.

Sincerely,

The signature is handwritten in black ink. It consists of a stylized 'S' at the top, followed by 'andra' and 'Tucker' stacked vertically. A horizontal line extends from the left side of the 'S' towards the right, ending with a small flourish.

Sandra S. Tucker

Attention: John Doresky, Supervisory Biologist

Subject: Request for Technical Assistance for
Threatened, Endangered, and Proposed Threatened and Endangered Species
(Revised Tower Type)
Proposed 340-Foot Self-Supporting Lattice Communications Structure
(350-Feet Overall Height with Appurtenances)
Senoia Radio Tower
300 Howard Road
Senoia, Coweta County, Georgia
Senoia GA USGS Quadrangle
N 33° 18' 13.9", W 84° 34' 13.2"
ECA Project Number: L-568-2

Dear Mr. Doresky:

Environmental Corporation of America (ECA) is assisting the Coweta County Board of Commissioners with environmental due diligence at the subject site. We initially requested technical assistance for this proposed tower site in a letter dated March 22, 2010. We are writing to inform you that the proposed tower type has changed. The tower was initially proposed as a 340-foot tall guyed-type communications structure (350-feet overall height with appurtenances). The tower is now proposed as a 340-foot tall self-supporting lattice communications structure (350-feet overall height with appurtenances). The tower height and location will remain the same.

As previously reported, there are no non-aquatic species listed as federally protected in Coweta County, Georgia. There are four aquatic species, all mussels, listed as federally protected in Coweta County. Although no stream or river impacts were anticipated by construction of the proposed radio tower as a guyed structure, the change in proposed tower type from a guyed structure to a self-supporting lattice structure would further reduce any potential impacts to

Mr. John Doresky
March 29, 2010
Page 2

surface waters in the area and would minimize any effects on protected mussels listed as protected in Coweta County.

Based on the information reviewed and our site inspection, ECA has found no evidence suggesting that federally protected species inhabit the site or the immediate site area (impact zone). Further, we have determined that the proposed undertaking is unlikely to jeopardize federally protected species.

We appreciate your assistance with this undertaking. Please advise us if there are questions or if the U.S. Fish and Wildlife Service has additional information which may be useful in our evaluation of the subject site for federally protected species.

Sincerely yours,
Environmental Corporation of America

N 33° 18' 13.9", W 84° 34' 13.2"
ECA Project Number: L-568-2

Dear Mr. Doresky:

Environmental Corporation of America (ECA) is assisting the Coweta County Board of Commissioners with environmental due diligence at the subject site.

Background

The subject site location is shown on Figure 1 of Appendix A. Figure 2 is a plan view that shows the site configuration. Figure 3 is a 2008 aerial photograph of the subject site and surrounding area. Coweta County plans to construct a 340-foot tall guyed-type communications structure (350-feet overall height with appurtenances) at the subject site. The proposed structure would be lit and would require guy wires.

The proposed communications structure would be located within an approximate 100-foot by 100-foot fenced compound in a wooded area. Clearing of trees surrounding the proposed fenced compound and along the southeastern and southwestern proposed guy wire easements would be required. The northern guy wire would be located in a wastewater spray field and would not require clearing. The site would be accessible from the northwest side of Howard Road. An approximate 400-foot long by 50-foot wide section of proposed access would traverse in a northerly direction from the northern end of the Senoia Senior Center parking lot through a

wooded area and would connect to an existing gravel drive that continues in a westerly direction for approximately 650 feet to the location of the proposed fenced compound. Photographs of the site area and access are provided in Appendix B. Descriptions of the photographs are provided underneath each photograph and photograph locations are graphically depicted on Figure 2.

According to the National Wetland Inventory Map overlay for the site area, no jurisdictional waters or wetlands lie on the subject site or within the access. No evidence of wetland indicators was observed on the subject site. However, an apparent intermittent or perennial stream, as well as listed hydric soils are located near the access and compound, indicating the possible presence of wetlands within the area. A Wetlands/Waters Determination and Delineation would be necessary to determine if jurisdictional waters or wetlands are present and whether such would be impacted by the proposed undertaking.

Purpose

The purpose of this letter is to provide you with documentation of our investigations and findings relative to federally protected species at the subject site and to request FWS technical assistance with our documentation.

Review of Available Documentation and Site Inspection

ECA has reviewed the most current U.S. Fish and Wildlife Service *Listed Species in Coweta County* and the Georgia Natural Heritage Program *Locations of Special Concern Animals, Plants and Natural Communities by Quarter Quadrangle*. ECA has also reviewed information from various sources pertaining to the habitat requirements of the listed species. Habitat at the site was evaluated during our March 15, 2010 site visit, which was conducted by Kim Morley of ECA.

Discussion of Findings

Species recognized by the U.S. Fish and Wildlife Service as inhabiting Coweta County, Georgia are listed in Appendix C. There are no non-aquatic species listed as federally protected in Coweta County, Georgia. There are four aquatic species, all mussels, listed as federally protected in Coweta County. Because no stream or river impacts are anticipated by construction of the proposed radio tower, these species, if present in the area of the subject site, would not be directly impacted by the proposed tower construction. ECA has recommended that stringent erosion and sediment control BMPs are implemented during and after construction of the proposed facility in order to prevent potential sediment runoff into surface waters and any effects on protected mussels listed as protected in Coweta County.

Further, no threatened or endangered species are listed by the *Georgia Natural Heritage Program* as having known occurrences within the Senoia, Georgia SW USGS Quarter 7.5-minute Topographic Quadrangle.

Conclusions

Based on the information reviewed and our site inspections, ECA has found no evidence suggesting that federally protected species inhabit the site or the immediate site area (impact zone). We do note that a detailed biological survey has not been completed. We have included a Tower Site Evaluation Form in Appendix D.

Closure

Kim Morley of ECA collected the applicable information, compiled this report, and conducted the site visit and area inspection. Mr. Marvin Webster reviewed this report. Mr. Webster is a degreed Biologist. His resume is included in Appendix E. We appreciate your assistance with this undertaking. Please advise us if there are questions or if the U.S. Fish and Wildlife Service has additional information which may be useful in our evaluation of the subject site for federally protected species.

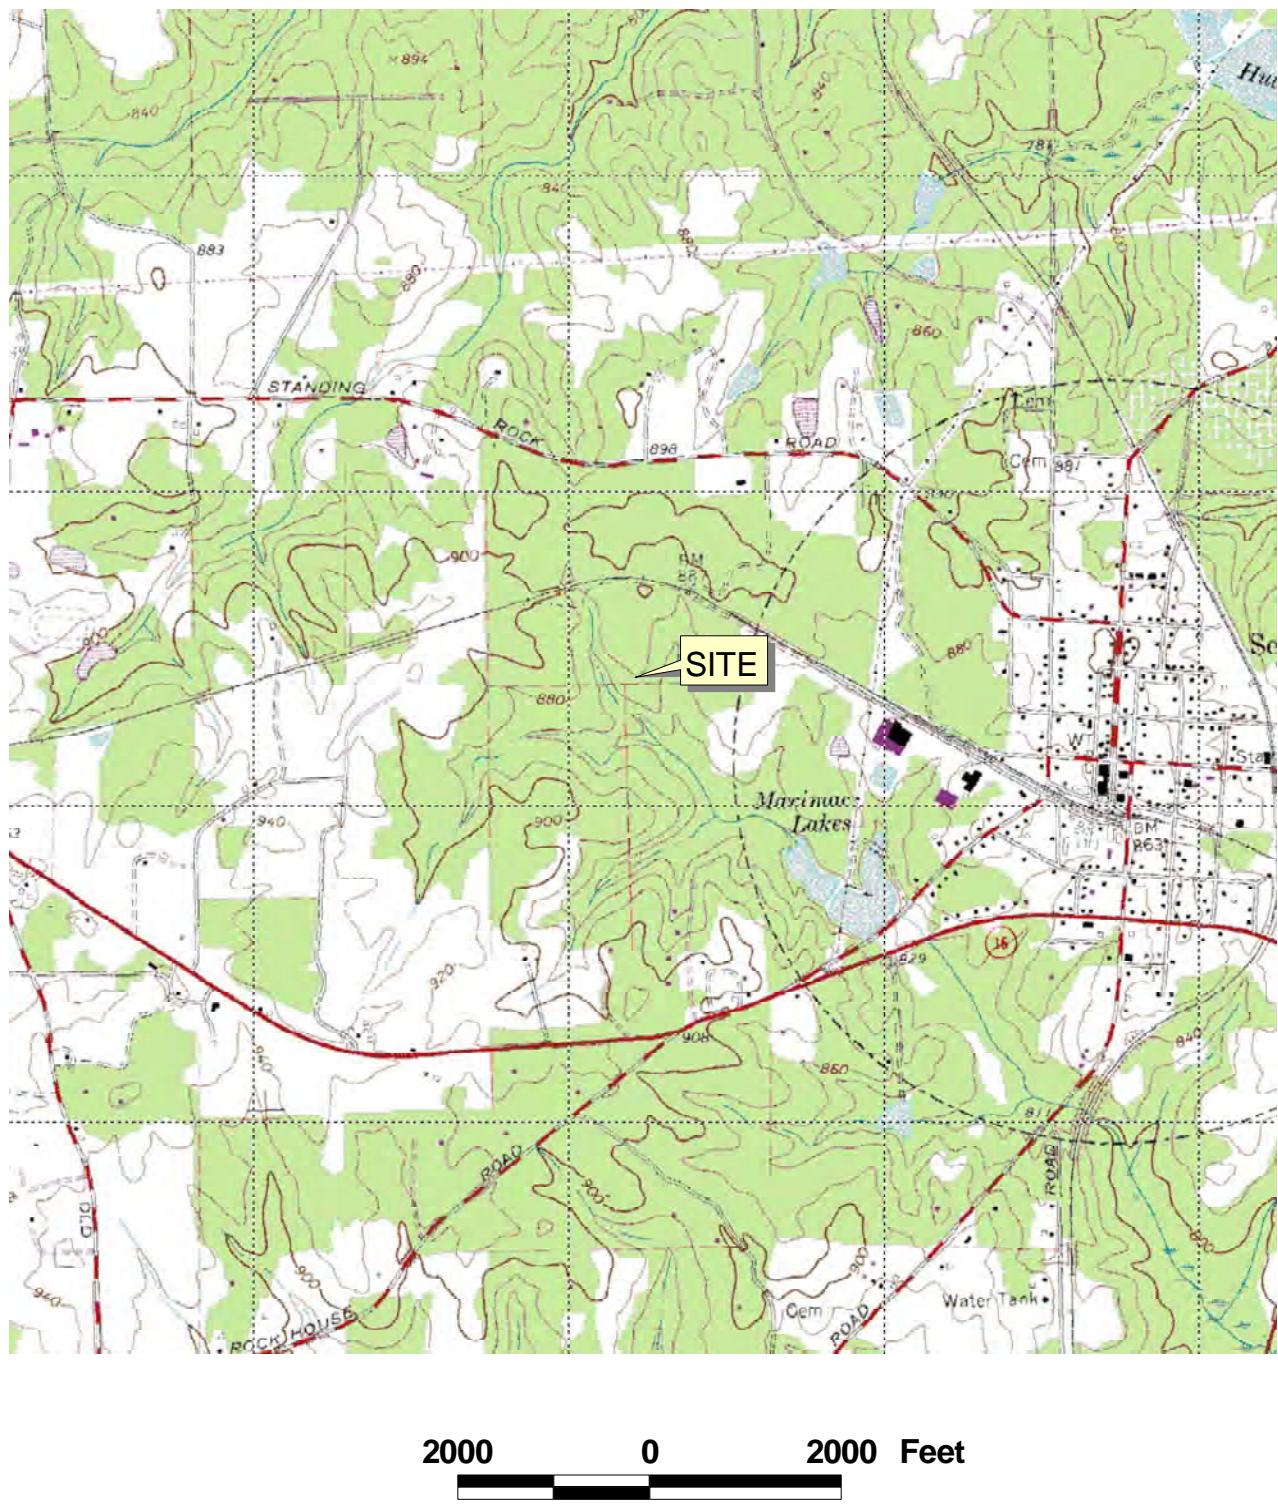

Sincerely yours,
Environmental Corporation of America

APPENDIX D
TOWER SITE EVALUATION FORM

TOWER SITE EVALUATION FORM

1. Location (Provide maps if possible):

State: GA County: Coweta Latitude/Longitude/GPS Grid: N 33°18'13.9"
W 84°34'13.2"

City and Highway Directions: From Atlanta, take I-75 south to Exit 237A. Merge onto GA-85 South and continue for 25 miles. Turn right onto GA-16. Follow for approximately 1.5 miles, and turn right onto Howard Road. Follow the existing asphalt drive to the Senoia Senior Center, and site will be in the wooded area to the northwest of the Senior Center.

2. Elevation above mean sea level: 879 feet

3. Will the equipment be co-located on an existing FCC licensed tower or other existing structure (building, billboard, etc.)? (y/n) No If yes, type of structure: _____

If yes, no further information is required.

4. If no, provide proposed specifications for new tower:

Height: 350' Construction type (lattice, monopole, etc.): Guyed
Guy-wired? (y/n) Yes No. Bands: Unknown Total No. Wires: Unknown
Lighting (Security & Aviation): Yes.

If tower will be lighted or guy-wired, complete items 5-20. If not, complete only items 19 and 20.

5. Area of tower footprint in acres or square feet: 100ft x 100ft fenced compound

6. Length and width of access road in feet: Approximately 1,050 feet long by 50 feet wide

7. General description of terrain – mountainous, rolling hills flat to undulation, etc. Photographs of the site and surrounding area are beneficial: Terrain slopes generally down to the south

8. Meteorological conditions (incidence of fog, low ceilings, etc.): Occasional fog

9. Soil type(s): Madison gravelly sandy loam and Riverview-Chewacla association

10. Habitat types and land use on and adjacent to the site, by acreage and percentage of total:

The proposed tower site and approximately 80% of adjoining land is wooded. The remaining approximately 20% of adjoining land is occupied by an existing gravel drive and a grassed area within a wastewater spray field.

11. Dominant vegetative species in each habitat: Young to intermediate pines and young hardwoods.
12. Average diameter breast height of dominant tree species in forested areas: 4-6"
13. Will construction at this site cause fragmentation of a larger block of habitat into two or more smaller blocks? (y/n) No If yes, describe: _____

14. Is evidence of birds roosts or rookeries present? (y/n) No If yes, describe: _____
15. Distance to nearest wetland area (forested swamp, march, riparian, marine, etc.), and coastline if applicable: Perennial streams located approximately 225 feet south of proposed tower location at its closest point.
16. Distance to nearest telecommunications tower: Not Known
17. Potential for co-location of antennas on existing towers or other structures: No
18. Have measures been incorporated to minimizing impacts to migratory birds? (y/n) No
19. Has an evaluation been made to determine if proposed facility may affect listed or proposed endangered or threatened species or their habitat as required by FCC regulation at 47 CFR 1.1307(a)(3)? (y/n)Yes If, yes present findings: See Report _____
20. Additional information required:

**RE: Radio Tower (350-foot): 300 Howard Road, Senoia
Coweta County, Georgia
HP-100329-016**

Dear Mr. Poole:

The Historic Preservation Division (HPD) has reviewed the information submitted concerning the proposed construction of a radio communications tower at the above location. Our comments are offered to assist the Federal Communications Commission (FCC) and its applicants in complying with the provisions of Section 106 of the National Historic Preservation Act of 1966, as amended (NHPA).

Based on the information provided, HPD concurs that no archaeological resources that are eligible for or listed in the National Register of Historic Places (NRHP) will be affected by the proposed undertaking due to the current survey, as defined in 36 CFR Part 800.4(d)(1). Concerning historic properties, HPD concurs that the Senoia Historic District is listed in the NRHP and that Resources 16804 (the Coach House) and 16842 should be considered eligible for inclusion in the NRHP. Additionally, HPD understands that the previously surveyed description of Resource 16782 does not match the existing property in the field. Furthermore, HPD concurs that the historic property that is extant in this location should be considered eligible for the NRHP. Moreover, HPD finds that the NRHP eligibility of Resources 18165 (the Lodge) and ECA Resource 8 (five Ranch houses on Plyant Street) is currently unknown as sufficient information to determine their NRHP eligibility was not provided, in accordance with and per the 2004 FCC Nationwide Programmatic Agreement. Finally, HPD concurs that the proposed tower will have **no adverse effect** to historic properties, as defined in 36 CFR Part 800.5(d)(1).

This letter evidences consultation with our office for compliance with Section 106 of the NHPA. It is important to remember that any future changes to this project as it is currently proposed may require additional consultation. HPD encourages federal agencies and project applicants to discuss such changes with our office to ensure that potential effects to historic resources are adequately considered in project planning.

If we may be of further assistance, please contact Michelle Volkema, Environmental Review Specialist, at michelle.volckema@dnr.state.ga.us or (404) 651-6546.

Sincerely,

A handwritten signature in black ink, appearing to read "Karen Anderson-Cordova".

Ms. Dina Bazzill,
Environmental Corporation of America
1375 Union Hill Industrial Court, Suite A
Alpharetta, Georgia 30004

Re: **City of Senoia**
Proposed 340-Foot Guyed-Type Communications Structure
(350-Feet with Appurtenances)
Senoia Radio Tower
300 Howard Road
Senoia, Coweta County, Georgia
Reference ECA Project # L-568-1

Dear Ms. Bazzill:

Thank you for accepting comments from the City of Senoia regarding the above mentioned communication tower. The City has worked closely with Coweta County officials to choose a site that will impact the fewest number of citizens. The proposed site is nearly 1000 feet from the nearest residential dwelling and over 4000 feet from the Senoia Historic District. The proposed tower is adjacent to the City's land application sanitary sewer system and athletic fields.

Though I am still awaiting comment from the Historic Preservation Commission (HPC), at this point I don't see any negative impacts from the proposed tower. If the HPC has comments, they will be sent by the chair of that commission.

If you have any questions or comments, please feel free to contact me.

Thank you,

Richard Ferry
City Administrator

Subject: **Section 106 Review**
TCNS ID #60893
Proposed 340-Foot Self-Supporting Lattice Communications Structure
(350-Foot Overall Height with Appurtenances)
Senoia Radio Tower
300 Howard Road
Senoia, Coweta County, Georgia
ECA Project # L-568-1

Dear Dr. Crass:

Environmental Corporation of America's (ECA) client, the Coweta County Board of Commissioners, is proposing to construct a 350-foot overall height self-supporting lattice communications structure at the subject site as described in the following FCC Form 620, New Tower (NT) Submission Packet.

ECA has identified and evaluated historic properties within the Area of Potential Effect (APE) for visual and direct effects as directed in Sections VI.D.1 and 2 of the Nationwide Programmatic Agreement, effective on March 7, 2005. We have found one property, the *Senoia Historic District* (ECA Resource 1), listed in the National Register of Historic Places (NRHP) within the ¾-mile APE for visual effects.

Based on our review of the files at the Georgia Historic Preservation Office (GA HPD) and the University of Georgia's Natural, Archaeological, and Historic Resources Geographical Information System (NAHRGIS), a 1992-1995 Coweta County survey revealed six previously identified historic resources located within the ¾-mile visual APE of the proposed project (ECA Resource 2 through ECA Resource 7). This Coweta County survey also revealed several

structures within the city limits of Senoia that were not previously surveyed because they were less than 50 years old at the time of the 1992-1995 survey. These resources were observed in the field, and one group of ranch-style residences was identified that may now be 50 years old. This group is identified as ECA Resource 8 in this report. No other structures that were identified in the previous survey as being less than 50 years old appear to be 50 years old at this time.

ECA Resource 1, the NRHP listed *Senoia Historic District*, is roughly bounded by Couch Street, the CSX Railroad tracks, GA Highway 16, and Plyant Street, and is located approximately 3,500 feet southeast of the proposed communications facility at its closest point. Only a small area along the westernmost boundary of the Historic District is located within the $\frac{3}{4}$ -mile APE for visual effects (see Attachment B-2a). There are eight previously surveyed structures located in the portion of the *Senoia Historic District* that is within the $\frac{3}{4}$ -mile APE. These are Coweta County Survey #CW-SE-69, #CW-SE-70, #CW-SE-105, #CW-SE-106, #CW-SE-107, #CW-SE-108, #CW-SE-109, and #CW-SE-110.

ECA chose to select representative Photo Locations (1a-1c) from which to conduct view shed assessments toward the proposed facility in order to evaluate the visual effect, if any, the proposed facility might have on the *Senoia Historic District*. The Locations chosen are labeled on the topographic map included in Attachments B-2. Photograph Locations and views back toward the proposed tower from the selected locations are included in Attachment B-1b/c. Due to distance and intervening vegetation, ECA believes the proposed tower would not be visible from within the *Senoia Historic District*. Therefore, we believe that the proposed communications facility will have no effect on ECA Resource 1.

ECA Resource 2 (Coweta County Survey #CW-SE-148, NAHRGIS #18165), the *Lodge*, is located approximately 2,800 feet southeast of the proposed communications facility. This historic resource is a stone structure constructed circa 1920 that is located on the property of Marimac Lakes Park in Senoia. ECA believes that ECA Resource 2 is potentially eligible for listing on the National Register. However, due to distance and intervening vegetation, we believe the proposed tower would not be visible from ECA Resource 2. Therefore, the proposed facility would have no effect on ECA Resource 2.

ECA Resource 3 (Coweta County Survey #147) was located approximately 3,675 feet southeast of the proposed communications facility. This resource has been destroyed. Therefore, the proposed facility would have no effect on ECA Resource 3.

ECA Resource 4 (Coweta County Survey #CW-656, NAHRGIS #16804), the *Coach House*, is located approximately 3,450 feet southeast of the proposed communications facility. This historic resource is a Queen Anne style structure constructed circa 1905. We believe that this structure is potentially eligible for listing on the National Register. However, due to distance and intervening vegetation, we believe the proposed tower would not be visible from ECA Resource 4. Therefore, the proposed facility would have no effect on ECA Resource 4.

ECA Resource 5 (Coweta County Survey #CW-634, NAHRGIS #16782) is located approximately 3,750 feet west of the proposed communications facility. The location of this resource in the Coweta County Survey appears correct; however, the description of the resource

does not appear to match that of resource observed during our site visit. The resource observed is an apparent 19th-century residence with a steeply pitched roof. Two barn/shed outbuildings, an apparent well house, and a modern garage were also observed on this property. ECA believes that this resource appears potentially eligible for listing on the National Register. However, due to intervening vegetation, there would be no view of the proposed tower from ECA Resource 5. Therefore, the proposed facility would have no effect on ECA Resource 5.

ECA Resource 6 is located approximately 3,450 feet northwest of the proposed communications facility and was identified as NA in the Coweta County Survey. Based on our observations, this appears to be a modern structure and we do not believe this resource is eligible for listing on the NRHP. Therefore, we believe there would be no effect on ECA Resource 6.

ECA Resource 7 (Coweta County Survey #CW-694, NAHRGIS #16842), is located approximately 3,400 feet northeast of the proposed communications facility. The actual location of this resource is approximately 800 feet east of its plotted location on the Coweta County Survey. This historic resource is a front-gable rectangular structure constructed circa 1920-1939. Two potentially historic outbuildings were noted to the north and northwest of this structure on the property, although one is dilapidated. ECA believes that ECA Resource 7 is potentially eligible for listing on the National Register. It appears that a portion of the proposed tower would be visible from this resource. However, due to distance and intervening vegetation, we believe views of the proposed tower from this resource would be minimal. Therefore, the proposed facility would have no effect on ECA Resource 7.

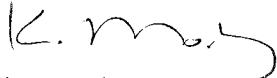

ECA Resource 8 consists of five residential structures located along Plyant Street, south of the boundary of the *Senoia Historic District*. On the 1992-1995 Coweta County Survey these resources were identified, but were not surveyed because they were less than 50 years old. Based on our observations in the field, it appears that these ranch-style residences may now be 50 years old. The closest of the structures is located approximately 3,500 feet southeast of the proposed communications facility. These resources may be potentially eligible for listing in the National Register. However, due to distance and intervening vegetation, we believe the proposed tower would not be visible from any of the structures within ECA Resource 8. Therefore, the proposed facility would have no effect on ECA Resource 8.

An Archaeological Assessment was conducted within the APE for direct effects. During our ¾-mile background research of available cultural records and databases, no previously recorded archaeological sites were identified within the APE for direct effects for the subject site. During our fieldwork, we discovered no archaeological sites and uncovered no archaeological cultural artifacts (see Attachment E-1c).

Based on this documentation, prepared in accordance with the Nationwide Programmatic Agreement effective March 7, 2005, ECA believes that this proposed facility would have no effect on any Historic Properties identified in accordance with the NPA. Therefore, we recommend a finding of "No Effect" for the proposed undertaking.

We are submitting this report for the Coweta County Board of Commissioners to seek concurrence with this finding and to comply with Federal Communications Commission (FCC) requirements as identified in 47 CFR 1.1307. We request your concurrence with our finding. Please contact our office with any questions or comments.

Sincerely,
Environmental Corporation of America

Kim Morley

1375 Union Hill Industrial Court, Suite A Alpharetta, GA 30004 (770) 667-2040 Ext. 111 dina.bazzill@eca-usa.com

EDUCATION

East Carolina University

M.A., Maritime Studies
Graduated: May 2007
GPA: 3.89/4.0

Greenville, NC

Southwest Missouri State University

B.A., Anthropology, minor in Antiquities
Graduated: May 2004, Magna Cum Laude
GPA: 3.8/4.0

Springfield, MO

RELATED EMPLOYMENT

June 2007 – Present

Environmental Corporation of America

Alpharetta, GA

Position: Principal Investigator

Responsibilities:

- Archaeological and historical research.
- Conducting archaeological and historical site assessments for Section 106 compliance.
- Authoring Section 106/archaeological assessment/phase one environmental assessment reports for submission to clients, SHPO offices, tribes, consulting parties, and other state agencies.
- Reviewing Section 106 reports.
- Authoring Fish and Wildlife species impact reports.
- Producing NEPA reports.

February 2007 – June 2007

H.L. Hunley Project/Clemson University

Charleston, SC

Position: Archaeological Research Assistant

Responsibilities/Training:

- Used Raindrop Geomagic Studio to produce digital images of human remains
- Used Rhinoceros NURBS Modeling to import digital models of human remains into the H.L. Hunley site plan
- Produced artifact illustrations

May 2006 – December 2006

University Archives

Greenville, NC

Position: Graduate Assistant

Responsibilities:

- Archived photographic negative collections
- Checked/corrected any errors in university archives website database
- Fulfilled image copy requests

August 2004 – December 2004 **Dr. Runyan, Maritime Studies Program Director**

Greenville, NC

Position: Graduate Assistant

Responsibilities:

- Pirates on the Perkins – Public education/outreach program
- Collaborated with professors to assess the program's research needs
- Collaborated with Joyner library staff and prepared a list of needed materials

RELEVANT EXPERIENCE

April 2008 – August 2008

City of Norcross – Proposed Greenspace Park

Norcross, GA

Supervisor: Artis West

Goals: The scope of work for this project includes a Phase I survey of a seven acre tract of land in the City of Norcross, Georgia. ECA will evaluate any archaeological and historic resources present within the survey area and advise the City of Norcross on how best to preserve these resource and utilize them for educational purposes.

June 2007 - Present

Section 106 Cell Tower Evaluations

USA

Supervisor: Artis West

Goals: The scope of work for these projects has included over 100 archaeological and historic standing structures site assessments for the Section 106 review process in several different states including California, Texas, Oklahoma, Kansas, Missouri, Illinois, Mississippi, Alabama, Florida, Idaho, Georgia, South Carolina, Tennessee, Pennsylvania, North Carolina, Virginia, Michigan, Connecticut, New York, and Indiana.

October 20-22, 2006

Shoreline Survey of Jamestown Island

Jamestown, VA

Supervisor: Jodi Carpenter

Goals: The purpose of this project was to assist Jodi Carpenter with her thesis research by locating and documenting shoreline sites based upon side scan sonar data gathered during a summer 2006 survey. Each sonar hit was relocated, examined, and documented if deemed cultural in nature. Documentation included recording GPS coordinates and northings, taking digital photographs, and sketching mud maps if necessary.

Fall 2005

Conservation Training

Greenville, NC

Instructor: Dr. Brad Rodgers

Goals: The purpose of this course was to provide training in basic artifact conservation utilizing minimal intervention and simple non-toxic procedures. Major projects included conservation of buttons composed of iron, lead or pewter, and copper alloy, all dating to the 1830s, as well as conservation of a wrought iron anchor. Additional requirements included proper artifact documentation through treatment logs and photography.

August 2005 – September 2005

ECU Fall Archaeological Field School

Sturgeon Bay, WI and Alpena, MI.

Supervisor: Dr. Brad Rodgers and Dr. Nathan Richards

Goals: The purpose of this field school was to allow advanced underwater archaeology students to organize, set-up, and document archaeological sites. In Sturgeon Bay, Wisconsin, students utilized skills gained from the Otsego project and in the classroom to conduct a Phase II examination of a steamboat. At the Thunder Bay National Marine Sanctuary in Alpena, Michigan, students followed up on a magnetometer survey conducted by the University of Rhode Island. Each anomaly was examined, photographed, and documented in the field by student divers. Upon returning to Greenville, students divided into teams to complete the mapping process and prepare site reports.

RESEARCH/SCHOLARLY ACTIVITIES

Publications

- *Sweetwater Mansions: Shipwreck Archaeology of the Great Lakes* - Chapter in this publication pending.
- National Register Nomination for the Steamboat Joys.
- *ACUA Underwater Archaeology Proceeding, 2007*. Edited by Victor Mastone, published by the Advisory Council on Underwater Archaeology

Research Papers/Presentations

- *Steamboats: The Missing Link Between Sail and Steam?* - Examined the link between Great Lakes steamboats and schooners and their role in the evolution of the Great Lakes bulk shipping trade. Was presented at the NASOH Great Lakes Conference at the Manitowoc Maritime Museum.
- *From Grunts to Gods: The Construction of Sugar Plantations in Barbados and Jamaica* - Examined the rise of the planter class in Jamaica and Barbados, and the effects of their dominance.
- *Homes of the Humblest: Mayan Household Archaeology* - Examined the much neglected field of household archaeology considering historic and archaeological resources.

B.S.E.S., Environmental Economics and Management, 2004

Athens, GA

PROFESSIONAL EXPERIENCE

November 2004 – Present **Environmental Corporation of America Alpharetta, GA**

Position: Client Manager/Senior Scientist/Project Manager

Responsibilities:

- Managing numerous projects for clientele to achieve environmental and NEPA compliance for prospectus communications facilities.
- Managing and completing Federal Communications Commission (FCC)/National Environmental Policy Act (NEPA) evaluations for communications facilities.
- Completing archaeological and historical site assessments for Section 106 compliance.
- Completing and submitting to the State Historic Preservation Offices Balloon Test Analyses/Evaluation of Proposed Tower Impacts on Historic Properties.
- Completing FCC Environmental Assessments for wetlands and floodplain mitigation for telecommunication applicants.
- Completing Phase I Environmental Assessments in compliance with the ASTM E1527-00 and ASTM E1527-05 standards and when appropriate completing Phase II Site Investigations.
- Air emissions permitting and compliance for industrial operations.

Summers 2000-2003

Tyler Hill Camp

Tyler Hill, PA

Position: Outdoor Adventure Staff Member/Program Director

Responsibilities:

- Developed curriculum for an eight week outdoor adventure and environmental program.
- Supervised execution of curriculum and managed a staff of 10 counselors.
- Conducted inventory counts and implemented safety standards.

REPRESENTATIVE PROJECT EXPERIENCE

Project Scientist/Manager; Section 106 Review and Archaeological Assessment; Over 100 sites in Arkansas, Alabama, Florida, Georgia, Mississippi, Louisiana, North Carolina, Tennessee, and Virginia; Excell Communications, Inc.; Trussville, Alabama.

Project Scientist/Manager; Balloon Test Analysis/Evaluation of Proposed Tower Impact on Historic Properties; 4 sites in Arkansas and Alabama; Excell Communications, Inc.; Trussville, Alabama.

Project Manager; Cemetery Evaluation for Determination of National Register of Historic Places (NRHP) Eligibility; Perkins Cemetery, Bibb County, Alabama; Excell Communications, Inc.; Trussville, Alabama.

Project Manager; Structure Evaluation for Determination of National Register of Historic Places (NRHP) Eligibility; Gordon County, Georgia; Excell Communications, Inc.; Trussville, Alabama.

Project Scientist/Manager; Federal Communications Commission (FCC)/National Environmental Policy Act (NEPA) Evaluations including Section 106 Review and Archaeological Assessment; Sites in Arkansas, North Carolina, New York, Iowa, and Ohio; Saga Communications; Grosse Pointe Farms, Michigan.

Project Scientist/Manager/Archaeological Field Technician; Federal Communications Commission (FCC)/National Environmental Policy Act (NEPA) Evaluations including Section 106 Review, Archaeological Assessment, and Phase I Environmental Site Assessments; 3 sites in Florida; NTCH-FL, Inc. (dba Cleartalk Wireless); Jacksonville Beach, Florida.

Project Scientist/Manager/Archaeological Field Technician; Federal Communications Commission (FCC)/National Environmental Policy Act (NEPA) Evaluations including Section 106 Review, Archaeological Assessment, and Phase I Environmental Site Assessments; 4 sites in Georgia; Compass Technology Services, Inc.; Acworth, Georgia.

Project Scientist/Manager/Archaeological Field Technician; Federal Communications Commission (FCC)/National Environmental Policy Act (NEPA) Evaluations including Section 106 Review and Archaeological Assessment; 4 sites in North and South Carolina; Nextel Communications/ Morrison Hershfield Corporation; Atlanta, Georgia.

Project Scientist/Manager; Federal Communications Commission (FCC)/National Environmental Policy Act (NEPA) Evaluations including Section 106 Review; 5 sites in Georgia; Nextel Communications/ Morrison Hershfield Corporation; Atlanta, Georgia.

Project Scientist/Manager/Archaeological Field Technician; Federal Communications Commission (FCC)/National Environmental Policy Act (NEPA) Evaluation including Section 106 Review, Archaeological Assessment, and Balloon Test Analysis/Evaluation of Proposed Tower Impact on Historic Properties; Rabun County, Georgia; Terminus Towers; Atlanta, Georgia.

Project Scientist/Manager/Archaeological Field Technician; Federal Communications Commission (FCC)/National Environmental Policy Act (NEPA) Evaluations including Section 106 Review, Archaeological Assessment, and Phase I Environmental Site Assessments; 8 sites in Alabama and Georgia; Southeast Towers, LLC; Atlanta, Georgia.

Project Scientist/Manager/Archaeological Field Technician; Federal Communications Commission (FCC)/National Environmental Policy Act (NEPA) Evaluations including Section 106 Review, Archaeological Assessment, and Phase I Environmental Site Assessments; 3 sites in Georgia; TLC Communications, LLC; Lawrenceville, Georgia.

Project Scientist/Manager; Limited Federal Communications Commission (FCC)/National Environmental Policy Act (NEPA) Environmental Checklists; 22 sites in Georgia; Alcoa Wireless Services, Inc.; Alpharetta, Georgia.

Project Scientist/Manager, Phase I Environmental Assessments for over 100 real estate transactions ranging from small tracts involving less than 1 acre to larger tracts including 450 acres.

Project Scientist/Manager; SIP Permit and Title V Permit Applications, Semi-Annual and Annual Compliance Certifications, Air Emission Fee Reporting, Toxic Release Inventory Reporting, Tier II Reporting, and 40 CFR 63 Subpart MMMM Compliance; Horton Vans, Inc.; Eatonton, Georgia.

Project Scientist/Manager; Title V Permit Application, Semi-Annual and Annual Compliance Certifications, Air Emission Fee Reporting, Toxic Release Inventory Reporting, and 40 CFR 63 Subpart MMMM Compliance; Horton Homes, Inc.; Eatonton, Georgia.

EDUCATION: Bachelor of Arts, Ancient History
University of Cape Town, Cape Town, South Africa, 1995
MCSE (Microsoft Certified Systems Engineer) 2000

PROFESSIONAL EXPERIENCE:

- 2008 - Present Project Scientist / Project Manager, Archaeological Field Technician, Environmental Corporation of America, Alpharetta, GA
Completed numerous Federal Communications Commission (FCC)/National Environmental Policy Act (NEPA) Evaluations, Section 106 Reviews (including research, photo reconnaissance, and SHPO/THPO consultation), Archaeological Investigations (including research and fieldwork), Endangered Species and Habitat Assessments/US FWS Consultation, Phase I Environmental Assessments, for various clients throughout the Southeast.
- 2001-2008 Product Development Manager, R2 Solutions
Oversaw product development for a pet product manufacturer. Involved in all aspects of product design, manufacturing and marketing.
- 1996-2001 PC Technician / Consultant
Implemented and helped maintain small networks. Performed PC builds, hardware upgrades, and troubleshooting.

REPRESENTATIVE PROJECTS

Project Scientist/Manager; Phase I Environmental Site Assessment and Federal Communications Commission (FCC)/National Environmental Policy Act (NEPA) Evaluation including Section 106 Review for a site in Duluth, Gwinnett County, Georgia; Compass Technology Services; Acworth, Georgia.

Project Scientist/Manager; Phase I Environmental Site Assessment and Federal Communications Commission (FCC)/National Environmental Policy Act (NEPA) Evaluation including Section 106 Reviews for a site in Lilburn, Gwinnett County, Georgia; Baran Telecom Inc.; Cumming, Georgia.

Project Scientist/Manager; Phase I Environmental Site Assessment for a site in Greensboro, Greene County, Georgia; Barinowski Investment Company; Grovetown, Georgia.

Project Scientist/Manager; Phase I Environmental Site Assessment for a site in Monck's Corner, Berkely County, South Carolina; Moncks Corner Healthcare Properties, Inc, Atlanta Georgia.

Project Scientist/Manager; Phase I Environmental Site Assessments and Federal Communications Commission (FCC)/National Environmental Policy Act (NEPA) Evaluations including Section 106 Reviews for multiple sites in Savannah, Chatham County, Georgia; Pat Marshall and Associates; Roswell, Georgia.

Project Scientist/Manager; Phase I Environmental Site Assessment and Federal Communications Commission (FCC)/National Environmental Policy Act (NEPA) Evaluation including Section 106 Review for a site in Norcross, Gwinnett County, Georgia; Compass Technology Services; Acworth, Georgia.

Project Scientist/Manager; Phase I Environmental Site Assessment and Federal Communications Commission (FCC)/National Environmental Policy Act (NEPA) Evaluation including Section 106 Reviews for a site in Cumming, Forsyth County, Georgia; SAI Communications.

Project Scientist/Manager; Phase I Environmental Site Assessment and Federal Communications Commission (FCC)/National Environmental Policy Act (NEPA) Evaluation including Section 106 Review for a site in Perry, Houston County, Georgia; SBA Network Services, Inc. and SBA Properties, Inc.; Boca Raton, Florida.

Project Scientist/Manager; Phase I Environmental Site Assessment for a site in Albany, Dougherty County, Georgia; NSORO LLC; Atlanta, Georgia.

Project Scientist/Manager; Phase I Environmental Site Assessment and Federal Communications Commission (FCC)/National Environmental Policy Act (NEPA) Evaluation including Section 106 Review for a site in Atlanta, DeKalb County, Georgia; Compass Technology Services; Acworth, Georgia.

Project Scientist; Phase I Environmental Site Assessment for a site in Midway, Liberty County, Georgia; Skylink Properties, LLC; Cumming, Georgia.

Project Scientist; Archaeological Assessment for a site in St. Augustine, St. Johns County, Florida; Cleartalk Wireless, Jacksonville, Florida.

Attachment C

Determination of Effect

1: Areas of Potential Effects

a: Direct Effects

The APE for direct effects is limited to the site of the proposed tower and surrounding easements, as described in the Nationwide Programmatic Agreement.¹ For this particular undertaking the area of disturbance would include the proposed 100-foot by 100-foot fenced compound, the existing approximate 650-foot long by 50-foot wide portion of access, the proposed approximate 400-foot long by 50-foot wide portion of access, and all of the immediately adjacent areas. The general APE for direct effects is shown in Attachment B-2b and Attachment B-2c.

b: Visual Effects

The APE for visual effects is the geographic area or areas within which the facility may directly or indirectly cause alterations in the character or use of Historic Properties.² Unless otherwise noted, the area of potential effect for visual effect is as described in the Nationwide Programmatic Agreement:

- If the proposed tower is 200 feet or less in overall height, the APE is $\frac{1}{2}$ mile in radius from the proposed tower.
- If the proposed tower is more than 200 feet in height and no more than 400 feet in height, the APE is $\frac{3}{4}$ -mile in radius from the proposed tower.
- If the proposed tower is more than 400 feet in height, the APE is $1 \frac{1}{2}$ miles in radius from the proposed tower.³

The APE for visual effects is shown in Attachment B-2a: Area of Visual Effect.

2: Mitigation of Effect

a: Copies of correspondence and summaries of oral communications with SHPO/THPO and any consulting parties including descriptions of alternatives that have been considered in order to avoid, minimize, or mitigate any adverse effects

Not Applicable

¹ Section VI.C.2 of the Nationwide Programmatic Agreement (WT Docket No. 03-128; FCC-222).

² Section II.3 of the Nationwide Programmatic Agreement (WT Docket No. 03-128; FCC-222).

³ Section VI.C.4.a-c of the Nationwide Programmatic Agreement (WT Docket No. 03-128; FCC-222).

Attachment D

Tribal and NHO Involvement

ECA made notification through the FCC Tower Construction Notification System TCNS in order to identify Indian Tribes and NHOs that may attach religious and cultural significance to historic properties that may be affected by the tower project within the APE for direct of visual effects.

ECA identified ten federally recognized Tribes that may be interested in participating in the Section 106 Review process in the county where the undertaking would occur. Any Tribe listed on the TCNS that did not respond within 14 days of initial notification received a follow-up letter. Any Tribes requesting to be involved in the Section 106 Review consultation process will be provided a copy of this submission packet, if requested, and will be provided an opportunity to comment on the proposed undertaking.

Copies of all relevant documents received to date, including correspondence, are provided in the following pages.

TRIBAL INVOLVEMENT

TCNS #60893 – INITIAL CONTACT February 26, 2010

INDIAN TRIBE OR NATION	SECOND TRIBAL CONTACT DATE	RESPONSE RECEIVED FROM TRIBE	REFER TO FCC	TRIBAL CLEARANCE

Subject: NOTICE OF ORGANIZATION(S) WHICH WERE SENT PROPOSED TOWER CONSTRUCTION NOTIFICATION INFORMATION - Email ID #2419673

Dear Sir or Madam:

Thank you for using the Federal Communications Commission's (FCC) Tower Construction Notification System (TCNS). The purpose of this electronic mail message is to inform you that the following authorized persons were sent the information you provided through TCNS, which relates to your proposed antenna structure. The information was forwarded by the FCC to authorized TCNS users by electronic mail and/or regular mail (letter).

Persons who have received the information that you provided include leaders or their designees of federally-recognized American Indian Tribes, including Alaska Native Villages (collectively "Tribes"), Native Hawaiian Organizations (NHOs), and State Historic Preservation Officers (SHPOs). For your convenience in identifying the referenced Tribes and in making further contacts, the City and State of the Seat of Government for each Tribe and NHO, as well as the designated contact person, is included in the listing below. We note that Tribes may have Section 106 cultural interests in ancestral homelands or other locations that are far removed from their current Seat of Government. Pursuant to the Commission's rules as set forth in the Nationwide Programmatic Agreement for Review of Effects on Historic Properties for Certain Undertakings Approved by the Federal Communications Commission (NPA), all Tribes and NHOs listed below must be afforded a reasonable opportunity to respond to this notification, consistent with the procedures set forth below, unless the proposed construction falls within an exclusion designated by the Tribe or NHO. (NPA, Section IV.F.4).

The information you provided was forwarded to the following Tribes and NHOs who have set their geographic preferences on TCNS. If the information you provided relates to a proposed antenna structure in the State of Alaska, the following list also includes Tribes located in the State of Alaska that have not specified their geographic preferences. For these Tribes and NHOs, if the Tribe or NHO does not respond within a reasonable time, you should make a reasonable effort at follow-up contact, unless the Tribe or NHO has agreed to different procedures (NPA, Section IV.F.5). In the event such a Tribe or NHO does not respond to a follow-up inquiry, or if a substantive or procedural disagreement arises between you and a Tribe or NHO, you must seek guidance from the Commission (NPA, Section IV.G). These procedures are further set forth in the FCC's Declaratory Ruling released on October 6, 2005 (FCC 05-176).

1. Historic Preservation Officer Bryant J Celestine - Alabama-Coushatta Tribe of Texas - Livingston, TX - electronic mail

Details: Please consider this notification as our interest for consultation regarding your proposal. The Alabama-Coushatta Tribe of Texas requests an administrative fee of \$300.00 for our services including internal file searches, elder consultations, and if necessary, travel expenses for a site

visit to complete our determination regarding your proposal. Take note of the following procedures as this will assist our efforts to provide your firm with the most efficient process in returning our determinations:

1. Submit your Form 620 or 621 to celestine.bryant@actribe.org. Each submission is logged and within 10 days of receipt, an invoice will be returned to the email account we receive your supplemental information.
2. INCLUDE your invoice number on your payment and submit according to the Invoice instructions. We cannot track your payment by project number so please do not submit without an invoice number.
3. Within 20 days of your original submission, you will receive an email response from our Office relating to our determinations for your proposal. This may occur despite a delay in fee payment.
4. In the event of an outstanding balance, a detailed invoice will be submitted in place of our determination. In this manner, your Section 106 obligations without Tribe ARE NOT complete until we have forwarded our written response indicating our determination.

Thank you, Bryant J. Celestine - Historic Preservation Officer

2. Chief Leo R Henry - Tuscarora Nation - Via: Lewiston, NY - regular mail
Details: If the Applicant/tower builder receives no response from the Tuscarora Nation within 30 days after notification through TCNS, the Tuscarora Nation has no interest in participating in pre-construction review for the site. The Applicant/tower builder, however, must IMMEDIATELY notify the Tuscarora Nation in the event archaeological properties or human remains are discovered during construction.

3. Archaeological Data Analyst Jennifer L Pietarila - Seminole Tribe of Florida - Clewiston, FL - electronic mail
Details: The Seminole Tribe of Florida Tribal Historic Preservation Office requests that all correspondence be conducted via email and email attachments. We also would like to request a Form 620 or 621 be provided for every cell tower submitted to us for review. Should you have any questions, please feel free to contact me at jenniferpietarila@semtribe.com or 863-983-6549 Ext. 12217. Thank you.

4. MEKKO and Acting Tribal Administrator Jennie Lillard - Kialegee Tribal Town - Wetumka, OK - regular mail
Details: If the Applicant receives no response from the Kialegee Tribal Town within 30 days after notification through TCNS, the Kialegee Tribal Town has no interest in participating in pre-construction review for the site. The Applicant, however, must immediately notify the Kialegee Tribal Town in the event archaeological properties or human remains are discovered during construction.

5. Historic Preservation Officer Seminole Nation - Seminole Nation of Oklahoma - Wewoka, OK - electronic mail
Details: If the Applicant/tower builder receives no response from the Seminole Nation of Oklahoma within 30 days after notification through TCNS, the Seminole Nation of Oklahoma has no interest in participating in pre-construction review for the site. The Applicant/tower builder, however,

must IMMEDIATELY notify the Seminole Nation of Oklahoma in the event archaeological properties or human remains are discovered during construction, consistent with Section IX of the Nationwide Programmatic Agreement and applicable law.

6. Policy Analyst Richard L Allen - Cherokee Nation - Tahlequah, OK - electronic mail

Details: The TCNS Details do not provide me enough information to conduct a proper assessment of the projects on behalf of the Cherokee Nation. Therefore, I request that I be sent a brief summary of the Phase I findings [please try to limit the summary to between 1--10 pages], a topo of the area, and relevant photos. Please send these by email to rallen@cherokee.org. Please treat this request for additional material as a routine supplement to the TCNS Details Notification for each of your projects that fall within our Tribe's areas of geographic interest. Consequently, if you do not receive a response from me within 30 days from the date on which you e-mailed the supplemental items to me, you may move forward with the 20-Day Letter procedures pursuant to the FCC's guidelines. Thank you. -- Dr. Richard L. Allen

7. Historic Preservation Officer Joyce A Bear - Muscogee (Creek) Nation - Okmulgee, OK - regular mail

Details: Because the TCNS Details do not provide enough information for me to conduct a proper assessment on behalf of the Muscogee (Creek) Nation of Oklahoma, I, instead, require that you send to me, BY MAIL, the following additional items only: 1) a copy of the 620 Form, 2) photos, 3) both a geographic & a topo map that clearly shows the site location. Please treat this request for additional information material as a routine supplement to the TCNS Details Notification for each of your projects that fall within our Tribe's areas of geographic interest.

Due to the high volume of 620 review request, as of June 1, 2009 it has become necessary for the Muscogee (Creek) Nation to initiate a Cultural Resource Review service fee. Upon receiving the 620 form, MCN will invoice your company. A letter of clearance will be sent upon remittance of service fee.

Thank you Joyce A. Bear, HPO Muscogee (Creek) Nation

8. THPO/NAGRA Representative Charles Coleman - Thlophlocco Tribal Town - Okemah, OK - electronic mail

9. THPO Kim Jumper - Shawnee Tribe - Miami, OK - regular mail

Details: THIS IS YOUR OFFICIAL NOTICE THAT THE SHAWNEE TRIBE IS INTERESTED IN CONSULTING ON ALL PROJECTS BUILT IN OUR AREAS OF GEOGRAPHIC INTEREST.

ATTENTION, NEW INFORMATION: Our procedures were updated on 14 January 2008. Please call Kim Jumper, THPO, at 918-542-2441, so that she can send you a copy.

If your tower is a co-location, please fax us this information to let us know. We cannot always tell from the TCNS web site that a tower is a co-location. We require a written response from you to let us know that it is a co-location. If a co-location project includes some new ground

disturbance (such as from an expanded compound or access road, or construction of an ancillary structure), the Shawnee Tribe treats such a project the same as any other non co-location project.

Our correct mailing/physical address is: 29 South Highway 69A. Our correct phone number is (918-542-2441) and our historic preservation fax line is (918-542-9915). THPO Kim Jumper manages all cell tower consultation.

As of 26 June 2006, all of the faxed responses of our final comments on a tower site will contain an original Shawnee Tribe signature. Each final comment fax is signed individually. Copies may be compared, for authentication, against the original in our files. If a final comment fax does not contain a signature, it is not valid. ALL FINAL COMMENTS FROM THE SHAWNEE TRIBE ARE WRITTEN; FINAL COMMENTS ARE NEVER PROVIDED VERBALLY. IF THE SHAWNEE TRIBE IS CREDITED WITH HAVING GIVEN A VERBAL RESPONSE, THAT RESPONSE IS NOT VALID.

If you receive notification through the TCNS listing the Shawnee Tribe, that is an indication that the Shawnee Tribe is interested in consulting on the tower for which that notification was received. Please consider that our official indication of interest to you. The Shawnee Tribe considers the Tower Construction Notification System's weekly e-mail to be the first notification that we receive that a tower will be constructed in an area of our concern. We do not view the TCNS notification as completion of 106 consultation obligations.

The Shawnee Tribe has developed streamlined consultation procedures for cell tower developers and their subcontractors. If you do not have a copy of the procedures - most recently updated on 14 January 2008 - please contact us, as you must follow these procedures to consult with us on cell tower projects. Call us at 918-542-2441 or fax us at 918-542-9915. It is the tower builder's responsibility to make sure that you have our most recent consultation procedures.

PLEASE DO NOT SEND US INFORMATION, QUERIES, OR COMMENTS ELECTRONICALLY. SINCE 1 DECEMBER 2005, WE HAVE NOT HANDLED ANY CELL TOWER CONSULTATION, INQUIRIES, OR CORRESPONDENCE VIA E-MAIL.

10. THPO Robert Thrower - Poarch Band of Creek Indians - Atmore, AL - electronic mail and regular mail

If the applicant/tower builder receives no response from the Poarch Band of Creek Indians within 30 days after notification through TCNS, the Poarch Band of Creek Indians has no interest in participating in pre-construction review for the proposed site. The Applicant/tower builder, however, must immediately notify the Poarch Band of Creek Indians in the event archaeological properties or human remains are discovered during construction, consistent with Section IX of the Nationwide Programmatic Agreement and applicable law.

The information you provided was also forwarded to the additional Tribes and NHOs listed below. These Tribes and NHOs have NOT set their geographic preferences on TCNS, and therefore they are currently receiving tower notifications for the entire United States. For these Tribes and NHOs, you are required to use reasonable and good faith efforts to determine if the

Tribe or NHO may attach religious and cultural significance to historic properties that may be affected by its proposed undertaking. Such efforts may include, but are not limited to, seeking information from the relevant SHPO or THPO, Indian Tribes, state agencies, the U.S. Bureau of Indian Affairs, or, where applicable, any federal agency with land holdings within the state (NPA, Section IV.B). If after such reasonable and good faith efforts, you determine that a Tribe or NHO may attach religious and cultural significance to historic properties in the area and the Tribe or NHO does not respond to TCNS notification within a reasonable time, you should make a reasonable effort to follow up, and must seek guidance from the Commission in the event of continued non-response or in the event of a procedural or substantive disagreement. If you determine that the Tribe or NHO is unlikely to attach religious and cultural significance to historic properties within the area, you do not need to take further action unless the Tribe or NHO indicates an interest in the proposed construction or other evidence of potential interest comes to your attention.

None

The information you provided was also forwarded to the following SHPOs in the State in which you propose to construct and neighboring States. The information was provided to these SHPOs as a courtesy for their information and planning. You need make no effort at this time to follow up with any SHPO that does not respond to this notification. Prior to construction, you must provide the SHPO of the State in which you propose to construct (or the Tribal Historic Preservation Officer, if the project will be located on certain Tribal lands), with a Submission Packet pursuant to Section VII.A of the NPA.

11. SHPO Lee Warner - Alabama Historical Commission - Montgomery, AL - electronic mail

12. Deputy SHPO Elizabeth Ann Brown - Alabama Historical Commission - Montgomery, AL - electronic mail

13. Environmental Review Specialist Michelle Volkema - Historic Preservation Division/DNR - Atlanta, GA - electronic mail and regular mail

14. Division Director W. Ray Luce - Historic Preservation Division/DNR - Atlanta, GA - electronic mail and regular mail

15. Deputy SHPO Richard Cloues - Historic Preservation Division/DNR - Atlanta, GA - electronic mail and regular mail

16. Environmental Review Coordinator Renee Gledhill Earley - NC State Historic Preservation Office - Raleigh, NC - electronic mail

17. Deputy SHPO David Brook - Historic Preservation Office - Raleigh, NC - electronic mail

18. SHPO Noel A Holcomb - Georgia Historic Preservation Division - Atlanta, GA - electronic mail

If you are proposing to construct a facility in the State of Alaska, you should contact Commission staff for guidance regarding your obligations in the event that Tribes do not respond to this notification within a reasonable time.

Please be advised that the FCC cannot guarantee that the contact(s) listed above opened and reviewed an electronic or regular mail notification. The following information relating to the proposed tower was forwarded to the person(s) listed above:

Subject: TCNS No 60893

Dear Kim,

We are hereby requesting consulting party status on any proposed projects that the Federal Communications Commission undertakes in the area of TCNS No.60893 located near Senoia, Georgia.

We would also strongly remind the Federal Communication Commission that it is their duty to consult with Indian tribes on a government-to-government basis and not that of the contractor. It is the duty of the agency official to "acknowledge that Indian tribes and Native Hawaiian organizations possess special expertise in assessing the eligibility of historic properties that may possess religious and cultural significance to them." As a contractor, you are aware of expenses that are incurred to provide your professional services. The Thlophlocco Tribal Town is also being asked to provide a professional service and therefore, should be compensated for their expertise. Our fee of \$150.00 per site will be sufficient to cover our time and expenses. If tribal representatives should have to travel to the site area, mileage, per diem and lodging, should be paid for by the Cell Tower Contractor.

If you have any questions, please feel free to contact me at (405) 786-2579, cell (405) 220-2195 or by e-mail at chascoleman@prodigy.net Thank you for your time and cooperation in this matter.

Sincerely,

Charles Coleman
Tribal Historical Preservation Officer
Thlophlocco Tribal Town

Subject: Reply to Proposed Tower Structure (Notification ID: 60893) - Email ID #2433575

Dear Dina M Bazzill,

Thank you for using the Federal Communications Commission's (FCC) Tower Construction Notification System (TCNS). The purpose of this email is to inform you that an authorized user of the TCNS has replied to a proposed tower construction notification that you had submitted through the TCNS.

The following message has been sent to you from THPO Kim Jumper of the Shawnee Tribe in reference to Notification ID #60893:

WE HAVE UPDATED OUR PROCEDURES FOR 2008 (EFFECTIVE 1-14-08). PLEASE MAKE SURE THAT YOU HAVE RECEIVED AND READ A COPY OF OUR UPDATED PROCEDURES .

Please use only the following address when sending materials to us:

Please use this fax number to contact us: 918-542-9915. Please do not contact us via e-mail.

SHAWNEE TRIBE
ATT: KIM JUMPER
HISTORIC PRESERVATION DEPT.
29 SOUTH HIGHWAY 69A
MIAMI, OK 74354

The Shawnee Tribe is interested in consulting on this tower, as we are in all towers in this geographic area. Ms. Kim Jumper is our manager for cell tower consultation. Please contact Kim Jumper, Asst. THPO, at 918-542-2441 if you have any questions on this or any other TCNS project.

For this particular tower to which we are responding, please follow our consultation procedures. If this tower is a CO-LOCATION, please fax us and let us know. We cannot always reliably tell from the TCNS web site when a tower is a co-location.

PLEASE, when you are mailing us regarding a cell tower, be sure to put Kim Jumper's name and Historic Preservation Department in the address. If you send any mailing just generally to the Shawnee Tribe, without including the name and department, several days or more may pass before the mailing is properly directed.

In the event that you are building another tower in this state and you did not receive a response from us through the TCNS, it is because the project was omitted from the TCNS web site, as we respond to ALL towers listed in our geographic areas on that web site. We take this opportunity to remind you that, even if a tower has been omitted from the TCNS web site, as occasionally happens, we are still interested in consulting on it.

For your convenience, the information you submitted for this notification is detailed below.

Historic Properties

Method of Identification:

The following sources and records were reviewed to identify Historic Properties within the Area of Potential Effect (APE) for visual effects:

- i. Properties listed in the National Register;
- ii. Properties formally determined eligible for listing by the Keeper of the National Register;
- iii. Properties that the SHPO/THPO certifies are in the process of being nominated to the National Register;
- iv. Properties previously determined eligible as part of a consensus determination of eligibility between the SHPO/THPO and a Federal Agency or local government representing the Department of Housing and Urban Development (HUD); and
- v. Properties listed in the SHPO/THPO Inventory that the SHPO/THPO has previously evaluated and found to meet the National Register Criteria, and that are identified accordingly in the SHPO/THPO Inventory.⁴

⁴ Section VI.D.1.a.i-v of the Nationwide Programmatic Agreement (WT Docket No. 03-128; FCC-222)

1: Historic Properties Identified in the APE for Direct Effects

a: Historic Properties identified within the APE for direct effects

If any Historic Properties were identified, see *Historic Properties* pages within the FCC Form 620, Page 7.

b: Historic Properties within the APE, not listed in “a”, that ECA Considers to be Eligible for Listing in the National Register as a result of ECA’s research.

ECA has identified no Historic Properties within the area for direct effects.

c: Description of techniques and methodology used to identify Historic Properties within the APE for direct effects.

See *Archaeological Assessment*, Attachment E-1c.

2: Historic Properties Identified in the APE for Visual Effects

- a: Historic Properties Identified in the APE for visual effects that are listed in the National Register, have been formally determined eligible by the Keeper of the National Register, or have been evaluated and found to meet NR criteria for listing by the SHPO/THPO and are identified as such in the SHPO/THPO inventory.**

If any historic resources were identified, see *Historic Properties* pages within the FCC Form 620, Page 7 **or** if more than ten identified historic resources see *Cultural Resource Report*, Attachment E-2a.

- b: Historic Properties, not listed in part “a,” that are in the APE for visual effects that were identified through the comments of Indian Tribes, NHOs, local government, or members of the public.**

No such Historic Properties were identified.

- c: Properties listed in part “a,” which ECA considers no longer eligible for inclusion in the National Register**

Not applicable.

ENVIRONMENTAL CORPORATION OF AMERICA
1375 UNION HILL INDUSTRIAL COURT, SUITE A
ALPHARETTA, GEORGIA 30004

ECA Project #: L-568-1

Executive Summary

Environmental Corporation of America (ECA) has completed an Archaeological Assessment for the federal undertaking at the subject site. The subject site is a proposed communications facility located in a wooded area near 300 Howard Road, Senoia, Coweta County, Georgia. The subject undertaking includes a proposed 100-foot by 100-foot communications compound, an approximate 650-foot long by 50-foot wide portion of existing access, an approximate 400-foot long by 50-foot wide portion of proposed access, a 340-foot self-supporting lattice communications structure (350-feet overall with appurtenances), and associated ground level support equipment.

This archaeological assessment was conducted in order to ascertain whether the proposed undertaking, on the project site, might directly or indirectly affect cultural resources, if any such resources exist. Through our review of available cultural records and databases, no previously recorded archaeological sites were identified within the area for direct effects. Furthermore, during the course of the field survey portion of this archaeological assessment, no archaeological cultural resources were encountered.

ECA believes that the proposed undertaking would have no effect on any historic or prehistoric archaeological resources that are listed in or eligible for listing in the National Register of Historic Places. Based on our findings related to archaeological resources, we recommend no further consultation under Section 106 Review of the National Historic Preservation Act for this proposed undertaking.

*An Archaeological Assessment of a
Proposed Approximate 100-Foot by 100-Foot Communications Compound
in Senoia, Coweta County, Georgia*

Background

Environmental Corporation of America was contracted by the Coweta County Board of Commissioners to perform an archaeological assessment as part of the Section 106 Review process for the proposed communications facility. The proposed facility would be located in a wooded area on property owned by the City of Senoia at 300 Howard Road, Senoia, Coweta County, Georgia. The purpose of our assessment was to determine whether any archaeological cultural resources might exist within the proposed project area.

The project area is located within the limits of the Senoia, Georgia, United States Geological Survey (USGS) 7.5-minute Topographic Quadrangle Map¹, as shown on Attachment B-2a. Attachment B-2c is a site vicinity plan that shows the site configuration. Attachment B-1d is an aerial photograph² of the site area.

The project site is located in a wooded area. The site would be accessible from the northwest side of Howard Road. An approximate 400-foot long by 50-foot wide section of proposed access would traverse in a northerly direction from the northern end of the Senoia Senior Center parking lot through a wooded area and would connect to an existing gravel drive that continues in a westerly direction for approximately 650 feet to the location of the proposed fenced compound. The proposed 100-foot by 100-foot communications compound is located at approximately N33° 18' 13.9" W84° 34' 13.2" (UTM 16 726215E 3687608N). Photographs of the proposed site and access are provided

¹ Geological Survey, 7.5-minute Topographic Quadrangle Map for Senoia, GA (1965, photorevised 1982).

² 2008 Google Earth Aerial Photograph.

in Attachment B-1a. Descriptions of the photographs are provided underneath each photograph.

The proposed project site is located within the Piedmont Physiographic Province at an approximate elevation of 879 feet Above Mean Sea Level (AMSL). The province is characterized by gently rolling topography and deeply weathered bedrock. The subject site slopes down to the south toward an apparent perennial stream located south of the project area. According to the Coweta County Soil Survey³, soils found within the proposed compound area are mapped as Madison gravelly sandy loam (MdC). The Madison series consists of well drained and moderately permeable soils found on gently sloping to steep uplands in the Piedmont.

The Area of Potential Effect (APE) is defined as “the geographic area or areas within which an Undertaking may directly or indirectly cause alterations in the character or use of Historic Properties, if any such properties exist.”⁴ For purposes of this work, the APE for direct effects is the actual physical impact area. The impact area includes the 100-foot by 100-foot compound, the approximate 650-foot long by 50-foot wide existing portion of proposed access, the approximate 400-foot long by 50-foot wide portion of proposed access, and all of the immediately adjacent areas.

Literature and Documents Search

National Register of Historic Places

The National Register of Historic Places⁵ is the Nation’s official list of cultural resources worthy of preservation. Authorized under the National Historic Preservation Act of 1966, the National Register is part of a national program to coordinate and support public and private efforts to identify, evaluate, and protect historic and archaeological resources. Properties listed in the National Register include districts, sites, buildings, structures, and

³ USDA Soil Conservation Service, *Web Soil Survey*.

⁴ Section II.A.3 of the Nationwide Programmatic Agreement (WT Docket No. 03-128; FCC-222).

⁵ National Register Information System, refreshed April 24, 2008, retrieved from <http://www.nr.nps.gov/>.

objects that are significant in American history, architecture, archaeology, engineering, and culture. The National Park Service, which is part of the U.S. Department of the Interior, administers the National Register. ECA conducted a review of the National Register of Historic Places to determine whether any listed properties were located within a $\frac{3}{4}$ -mile radius of the project site. Our research revealed one National Register listed District, the *Senoia Historic District* located within the $\frac{3}{4}$ -mile radius for background research. No portion of the *Senoia Historic District* is located within the APE for direct effects for this project.

Georgia Historic Resources Survey

The Georgia Historic Resource Survey files are a compilation of historic resource surveys throughout the state. The individual surveys cover either a countywide or a community-wide area. Information regarding each individual historic resource includes an architectural description of the structure, its approximate age, and location. We reviewed these files to discover whether historic resources were within the general area of the project site and to determine if there may be a probability of historic archaeological sites within the area. Based on our review of the files at the Georgia Historic Preservation Office (GA HPD) and of the University of Georgia's Natural, Archaeological, and Historic Resources Geographical Information System (NAHRGIS), no identified historic resources were found to be located within the APE for direct effects for the proposed undertaking.

Georgia Archaeological Site File

The Georgia Archaeological Site File (GASF)⁶ is the official repository for information about known archaeological sites from all periods within the state of Georgia. It has become the primary source for documentation about Georgia Archaeology. The GASF contains many different types of information about archaeological sites, including locations, cultural periods, and information relating to the National Register of Historic

⁶ Georgia Archaeological Site Files at the University of Georgia.

Places. The background research of these files included our ¾-mile search radius that revealed two archaeological reports, but no previously recorded archaeological sites.

Archaeological Report 4950, *Archaeological Assessment of Project NH-022-1* (27), *Coweta/Spalding Counties*, was completed in 1997 along SR 16 prior to paving of the existing shoulders of the road, which is located approximately 3,500 feet south of the proposed tower compound at its closest point. No archaeological sites were discovered during this survey.

Archaeological Report 3869 provided by the GASF does not coincide with the project area identified within a ¾-mile radius of the proposed project site. The appropriate file could not be located by GASF. Regardless, the project area associated with this report is located outside of the APE for direct effects for the proposed undertaking, and any archaeological sites that may have been discovered during this survey would not be impacted by the proposed undertaking.

Field Methods

The Phase I intensive field survey implemented standard survey techniques and was performed by Kim Morley of ECA on March 15, 2010. Reconnaissance by field walking was conducted by visual inspection of exposed ground surfaces throughout the 100-foot by 100-foot proposed compound, along the length of the approximate 650-foot long by 50-foot wide existing portion of proposed access, and along the length of the approximate 400-foot long by 50-foot wide portion of proposed access.

ECA determined that six subsurface test units would be an adequate sampling of the proposed compound and the proposed section of access. The subsurface tests consisted of circular shovel test pits excavated to a depth of 80 cm or until the sterile subsoil, bedrock, or the water table was encountered. The subsurface tests were located as shown on Attachment B-2c. Photographs I and J of Attachment B-1a show a top view and soil

profile of Shovel Test Pit Three (STP3), respectively. All excavated soils are screened through a six-millimeter wire mesh archaeology screen to isolate any cultural artifacts.

Field Survey Results

Visual inspection revealed that the project site and proposed section of access are located in wooded areas. The ground surface within the proposed compound area slopes down to the south toward an apparent perennial stream located south of the project area. Ground cover in the wooded areas consisted mostly of leaf litter, and ground surface visibility in these areas was near zero percent. Ground visibility along the portion of access that follows an existing gravel drive was approximately 90 percent.

Soils found within the proposed compound area are mapped as Madison gravelly sandy loam (MdC). The Madison series consists of well drained and moderately permeable soils found on gently sloping to steep uplands in the Piedmont. According to the Munsell soil color chart, the dominant soil color of STP3 consisted of a 5YR 4/3, reddish brown, top soil from about 0 to 5 inches below surface with a 2.5YR 4/6, red, subsoil from about 5 to 10 inches. The soils encountered were generally consistent with the official series description of the Madison series. Results from all six shovel tests were similar, although saturated soils and standing water were reached in STP6 at 12 inches below surface.

The six subsurface test units were negative for artifacts. ECA discovered no archaeological sites and recovered no cultural material during the examination of exposed ground surfaces and subsurface testing.

Laboratory Methods and Collection Curation

For archaeological sites identified within the State of Georgia, ECA will curate all photographs, field notes, maps and documentation pertinent to the archaeological assessment at the Waring Archaeological Laboratory located at the University of West Georgia, Carrollton, Georgia, as appropriate. This repository meets Department of the Interior curation standards as defined under 36CFR Part 79. Since no artifacts were discovered, no curation is necessary.

Summary of Findings and Recommendations

During the course of this archaeological assessment, no sites, either historic or prehistoric, were located in the APE for direct effects. We believe that no archaeological cultural resources will be affected by the proposed project. Therefore, we recommend a finding of No Effect for the proposed undertaking as it relates to archaeology. We request your concurrence with our finding.

Closure

We are submitting this report for the Coweta County Board of Commissioners to seek concurrence with our finding and to comply with Federal Communications Commission (FCC) requirements as identified in 47 CFR 1.1307. Kim Morley, Project Manager, performed the fieldwork and authored this assessment. Steve Bernstein conducted the research. Dina M. Bazzill, MA, RPA, Principal Investigator, reviewed this assessment. Please contact our office with any questions or comments.

Kim Morley:

As per your request, a search of the Site File records was completed in order to determine if there are any previously recorded archaeological sites within a $\frac{1}{4}$ mile radius of the following area:

PROJECT NUMBER – L-568-1
TOPOGRAPHIC QUADRANGLE – Senoia
COUNTY – Cook

There are 0 sites located within a $\frac{1}{4}$ mile radius of the tower search area. There are 2 projects (3869, 4950) within this same area.

Your firm has 0 of 5 tower searches remaining on this invoice.

Please be aware that there could possibly be sites that have not been detected in these areas. The limitations of a site search done at the Georgia Archaeological Site File are more completely explained in our Paragraph of Disclaimer. Please know that this search does not fulfill the requirements of the Section 106 laws in the National Historic Preservation Act. If you have questions on the Section 106 law, please contact the Environmental Review Coordinator at the Georgia State Historic Preservation office at (404) 651-6624. Also, if you have any questions or need additional information from the Georgia Archaeological Site File, do not hesitate to call us at (706) 542-8737.

PLEASE NOTE THAT SITE FORMS, PROJECT REPORTS, THE SITE FILE MAPS OR ANY OTHER INFORMATION REGARDING SITE LOCATIONS ARE NOT FOR PUBLIC RELEASE.

Sincerely, Jessie Hughes

Subject: NOTICE OF ORGANIZATION(S) WHICH WERE SENT PROPOSED TOWER CONSTRUCTION NOTIFICATION INFORMATION - Email ID #2419673

Dear Sir or Madam:

Thank you for using the Federal Communications Commission's (FCC) Tower Construction Notification System (TCNS). The purpose of this electronic mail message is to inform you that the following authorized persons were sent the information you provided through TCNS, which relates to your proposed antenna structure. The information was forwarded by the FCC to authorized TCNS users by electronic mail and/or regular mail (letter).

Persons who have received the information that you provided include leaders or their designees of federally-recognized American Indian Tribes, including Alaska Native Villages (collectively "Tribes"), Native Hawaiian Organizations (NHOs), and State Historic Preservation Officers (SHPOs). For your convenience in identifying the referenced Tribes and in making further contacts, the City and State of the Seat of Government for each Tribe and NHO, as well as the designated contact person, is included in the listing below. We note that Tribes may have Section 106 cultural interests in ancestral homelands or other locations that are far removed from their current Seat of Government. Pursuant to the Commission's rules as set forth in the Nationwide Programmatic Agreement for Review of Effects on Historic Properties for Certain Undertakings Approved by the Federal Communications Commission (NPA), all Tribes and NHOs listed below must be afforded a reasonable opportunity to respond to this notification, consistent with the procedures set forth below, unless the proposed construction falls within an exclusion designated by the Tribe or NHO. (NPA, Section IV.F.4).

The information you provided was forwarded to the following Tribes and NHOs who have set their geographic preferences on TCNS. If the information you provided relates to a proposed antenna structure in the State of Alaska, the following list also includes Tribes located in the State of Alaska that have not specified their geographic preferences. For these Tribes and NHOs, if the Tribe or NHO does not respond within a reasonable time, you should make a reasonable effort at follow-up contact, unless the Tribe or NHO has agreed to different procedures (NPA, Section IV.F.5). In the event such a Tribe or NHO does not respond to a follow-up inquiry, or if a substantive or procedural disagreement arises between you and a Tribe or NHO, you must seek guidance from the Commission (NPA, Section IV.G). These procedures are further set forth in the FCC's Declaratory Ruling released on October 6, 2005 (FCC 05-176).

1. Historic Preservation Officer Bryant J Celestine - Alabama-Coushatta Tribe of Texas - Livingston, TX - electronic mail
Details: Please consider this notification as our interest for consultation regarding your proposal. The Alabama-Coushatta Tribe of Texas requests an administrative fee of \$300.00 for our services including internal file searches, elder consultations, and if necessary, travel expenses for a site visit to complete our determination regarding your proposal. Take note of the following procedures as this will assist our efforts to provide your firm with the most efficient process in returning our determinations:

1. Submit your Form 620 or 621 to celestine.bryant@actribe.org. Each submission is logged and within 10 days of receipt, an invoice will be returned to the email account we receive your supplemental information.
2. INCLUDE your invoice number on your payment and submit according to the Invoice instructions. We cannot track your payment by project number so please do not submit without an invoice number.

3. Within 20 days of your original submission, you will receive an email response from our Office relating to our determinations for your proposal.

This may occur despite a delay in fee payment.

4. In the event of an outstanding balance, a detailed invoice will be submitted in place of our determination. In this manner, your Section 106 obligations without Tribe ARE NOT complete until we have forwarded our written response indicating our determination.

Thank you, Bryant J. Celestine - Historic Preservation Officer

2. Chief Leo R Henry - Tuscarora Nation - Via: Lewiston, NY - regular mail

Details: If the Applicant/tower builder receives no response from the Tuscarora Nation within 30 days after notification through TCNS, the Tuscarora Nation has no interest in participating in pre-construction review for the site. The Applicant/tower builder, however, must IMMEDIATELY notify the Tuscarora Nation in the event archaeological properties or human remains are discovered during construction.

3. Archaeological Data Analyst Jennifer L Pietarila - Seminole Tribe of Florida - Clewiston, FL - electronic mail

Details: The Seminole Tribe of Florida Tribal Historic Preservation Office requests that all correspondence be conducted via email and email attachments. We also would like to request a Form 620 or 621 be provided for every cell tower submitted to us for review. Should you have any questions, please feel free to contact me at jenniferpietarila@semtribe.com or 863-983-6549 Ext. 12217. Thank you.

4. MEKKO and Acting Tribal Administrator Jennie Lillard - Kialegee Tribal Town - Wetumka, OK - regular mail

Details: If the Applicant receives no response from the Kialegee Tribal Town within 30 days after notification through TCNS, the Kialegee Tribal Town has no interest in participating in pre-construction review for the site. The Applicant, however, must immediately notify the Kialegee Tribal Town in the event archaeological properties or human remains are discovered during construction.

5. Historic Preservation Officer Seminole Nation - Seminole Nation of Oklahoma - Wewoka, OK - electronic mail

Details: If the Applicant/tower builder receives no response from the Seminole Nation of Oklahoma within 30 days after notification through TCNS, the Seminole Nation of Oklahoma has no interest in participating in pre-construction review for the site. The Applicant/tower builder, however, must IMMEDIATELY notify the Seminole Nation of Oklahoma in the event archaeological properties or human remains are discovered during construction, consistent with Section IX of the Nationwide Programmatic Agreement and applicable law.

6. Policy Analyst Richard L Allen - Cherokee Nation - Tahlequah, OK - electronic mail

Details: The TCNS Details do not provide me enough information to conduct a proper assessment of the projects on behalf of the Cherokee Nation.

Therefore, I request that I be sent a brief summary of the Phase I findings [please try to limit the summary to between 1--10 pages], a topo of the area, and relevant photos. Please send these by email to rallen@cherokee.org.

Please treat this request for additional material as a routine supplement to the TCNS Details Notification for each of your projects that fall within our Tribe's areas of geographic interest. Consequently, if you do not receive a response from me within 30 days from the date on which you e-mailed the supplemental items to me, you may move forward with the 20-Day Letter procedures pursuant to the FCC's guidelines. Thank you. -- Dr. Richard L.

Allen

7. Historic Preservation Officer Joyce A Bear - Muscogee (Creek) Nation - Okmulgee, OK - regular mail

Details: Because the TCNS Details do not provide enough information for me to conduct a proper assessment on behalf of the Muscogee (Creek) Nation of Oklahoma, I, instead, require that you send to me, BY MAIL, the following additional items only: 1) a copy of the 620 Form, 2) photos, 3) both a geographic & a topo map that clearly shows the site location. Please treat this request for additional information material as a routine supplement to the TCNS Details Notification for each of your projects that fall within our Tribe's areas of geographic interest.

Due to the high volume of 620 review request, as of June 1, 2009 it has become necessary for the Muscogee (Creek) Nation to initiate a Cultural Resource Review service fee. Upon receiving the 620 form, MCN will invoice your company. A letter of clearance will be sent upon remittance of service fee.

Thank you Joyce A. Bear, HPO Muscogee (Creek) Nation

8. THPO/NAGRA Representative Charles Coleman - Thlophlocco Tribal Town - Okemah, OK - electronic mail

9. THPO Kim Jumper - Shawnee Tribe - Miami, OK - regular mail

Details: THIS IS YOUR OFFICIAL NOTICE THAT THE SHAWNEE TRIBE IS INTERESTED IN CONSULTING ON ALL PROJECTS BUILT IN OUR AREAS OF GEOGRAPHIC INTEREST.

ATTENTION, NEW INFORMATION: Our procedures were updated on 14 January 2008.
Please call Kim Jumper, THPO, at 918-542-2441, so that she can send you a copy.

If your tower is a co-location, please fax us this information to let us know. We cannot always tell from the TCNS web site that a tower is a co-location. We require a written response from you to let us know that it is a co-location. If a co-location project includes some new ground disturbance (such as from an expanded compound or access road, or construction of an ancillary structure), the Shawnee Tribe treats such a project the same as any other non co-location project.

Our correct mailing/physical address is: 29 South Highway 69A. Our correct phone number is (918-542-2441) and our historic preservation fax line is (918-542-9915). THPO Kim Jumper manages all cell tower consultation.

As of 26 June 2006, all of the faxed responses of our final comments on a tower site will contain an original Shawnee Tribe signature. Each final comment fax is signed individually. Copies may be compared, for authentication, against the original in our files. If a final comment fax does not contain a signature, it is not valid. **ALL FINAL COMMENTS FROM THE SHAWNEE TRIBE ARE WRITTEN; FINAL COMMENTS ARE NEVER PROVIDED VERBALLY. IF THE SHAWNEE TRIBE IS CREDITED WITH HAVING GIVEN A VERBAL RESPONSE, THAT RESPONSE IS NOT VALID.**

If you receive notification through the TCNS listing the Shawnee Tribe, that is an indication that the Shawnee Tribe is interested in consulting on the tower for which that notification was received. Please consider that our official indication of interest to you. The Shawnee Tribe considers the Tower Construction Notification System's weekly e-mail to be the first notification that we receive that a tower will be constructed in an area of our concern. We do not view the TCNS notification as completion of 106 consultation obligations.

The Shawnee Tribe has developed streamlined consultation procedures for cell tower developers and their subcontractors. If you do not have a copy of the procedures - most recently updated on 14 January 2008 - please contact us, as you must follow these procedures to consult with us on cell tower projects.

Call us at 918-542-2441 or fax us at 918-542-9915. It is the tower builder's responsibility to make sure that you have our most recent consultation procedures.

**PLEASE DO NOT SEND US INFORMATION, QUERIES, OR COMMENTS ELECTRONICALLY.
SINCE 1 DECEMBER 2005, WE HAVE NOT HANDLED ANY CELL TOWER CONSULTATION, INQUIRIES, OR CORRESPONDENCE VIA E-MAIL.**

10. THPO Robert Thrower - Poarch Band of Creek Indians - Atmore, AL - electronic mail and regular mail

If the applicant/tower builder receives no response from the Poarch Band of Creek Indians within 30 days after notification through TCNS, the Poarch Band of Creek Indians has no interest in participating in pre-construction review for the proposed site. The Applicant/tower builder, however, must immediately notify the Poarch Band of Creek Indians in the event archaeological properties or human remains are discovered during construction, consistent with Section IX of the Nationwide Programmatic Agreement and applicable law.

The information you provided was also forwarded to the additional Tribes and NHOs listed below. These Tribes and NHOs have NOT set their geographic preferences on TCNS, and therefore they are currently receiving tower notifications for the entire United States. For these Tribes and NHOs, you are required to use reasonable and good faith efforts to determine if the Tribe or NHO may attach religious and cultural significance to historic properties that may be affected by its proposed undertaking. Such efforts may include, but are not limited to, seeking information from the relevant SHPO or THPO, Indian Tribes, state agencies, the U.S. Bureau of Indian Affairs, or, where applicable, any federal agency with land holdings within

the state (NPA, Section IV.B). If after such reasonable and good faith efforts, you determine that a Tribe or NHO may attach religious and cultural significance to historic properties in the area and the Tribe or NHO does not respond to TCNS notification within a reasonable time, you should make a reasonable effort to follow up, and must seek guidance from the Commission in the event of continued non-response or in the event of a procedural or substantive disagreement. If you determine that the Tribe or NHO is unlikely to attach religious and cultural significance to historic properties within the area, you do not need to take further action unless the Tribe or NHO indicates an interest in the proposed construction or other evidence of potential interest comes to your attention.

None

The information you provided was also forwarded to the following SHPOs in the State in which you propose to construct and neighboring States. The information was provided to these SHPOs as a courtesy for their information and planning. You need make no effort at this time to follow up with any SHPO that does not respond to this notification. Prior to construction, you must provide the SHPO of the State in which you propose to construct (or the Tribal Historic Preservation Officer, if the project will be located on certain Tribal lands), with a Submission Packet pursuant to Section VII.A of the NPA.

11. SHPO Lee Warner - Alabama Historical Commission - Montgomery, AL - electronic mail

12. Deputy SHPO Elizabeth Ann Brown - Alabama Historical Commission - Montgomery, AL - electronic mail

13. Environmental Review Specialist Michelle Volkema - Historic Preservation Division/DNR - Atlanta, GA - electronic mail and regular mail

14. Division Director W. Ray Luce - Historic Preservation Division/DNR - Atlanta, GA - electronic mail and regular mail

15. Deputy SHPO Richard Cloues - Historic Preservation Division/DNR - Atlanta, GA - electronic mail and regular mail

16. Environmental Review Coordinator Renee Gledhill Earley - NC State Historic Preservation Office - Raleigh, NC - electronic mail

17. Deputy SHPO David Brook - Historic Preservation Office - Raleigh, NC - electronic mail

18. SHPO Noel A Holcomb - Georgia Historic Preservation Division - Atlanta, GA - electronic mail

If you are proposing to construct a facility in the State of Alaska, you should contact Commission staff for guidance regarding your obligations in the event that Tribes do not respond to this notification within a reasonable time.

Please be advised that the FCC cannot guarantee that the contact(s) listed above opened and reviewed an electronic or regular mail notification. The following information relating to the proposed tower was forwarded to the person(s) listed above:

Notification Received: 02/23/2010

Notification ID: 60893

Hello Mr. Celestine,

Attached is the Section 106 Review for a proposed 350-foot overall height communications structure, TCNS ID# 60893. I wanted to inform you that for this proposed project, the tower was initially proposed as a guyed-type structure, but is now proposed as a self-supporting lattice communications structure. The tower height and location will remain the same. Please feel free to contact me with any questions or if you need any additional information regarding this project. Thanks for your help.

Dear Chief Henry:

This is a courtesy email to inform you of a change to the specifications provided for TCNS #60893. Since our consultation was initiated on February 26, 2010, the proposed tower type has changed. The tower was initially proposed as a guyed-type structure, but is now proposed as a self-supporting lattice communications structure. The tower height and location will remain the same.

If you need any other information to aide the Tuscarora Nation in determining if this proposed tower location is a concern please do not hesitate to contact me. If we do not hear from the Tuscarora Nation within 30 days, we will presume that construction activities at the site can proceed as planned. Thank you and please feel free to contact me with any questions or if you require any additional information.

Sincerely,

Kim Morley

Thlophlocco Tribal Town does not object to the proposed Construction of FCC TCNS # 60893, to be located near Senoia, Georgia.

I believe that their may have been previous ground disturbances; However: *if they dig , Please,tell the contractor that in case of an inadvertent discovery of American Indian remains or artifacts they should stop and notify the tribes*

*Charles Coleman,
Thlophlocco Tribal Town*

TRANSMITTAL COVER SHEET

Date: March 29, 2010

Subject: Revised Tower Type
TCNS 60893
Proposed 340-Foot Self-Supporting Lattice Communications Structure
(350-Foot Overall Height with Appurtenances)
Senoia Radio Tower
300 Howard Road
Senoia, Coweta County, Georgia
ECA Project Number: L-568-2

Notes: Dear Mr. Thrower:

This is a courtesy email to inform you of a change to the specifications provided for TCNS #60893. Since our consultation was initiated on February 26, 2010, the proposed tower type has changed. The tower was initially proposed as a guyed-type structure, but is now proposed as a self-supporting lattice communications structure. The tower height and location will remain the same.

If you need any other information to aide the Poarch Band of Creek Indians in determining if this proposed tower location is a concern please do not hesitate to contact me. If we do not hear from the Poarch Band of Creek Indians within 30 days, we will presume that construction activities at the site can proceed as planned. Thank you and please feel free to contact me with any questions or if you require any additional information.

Sincerely,

Kim Morley

To: Kim Morley
Subject: RE: Proposed Communications Structure - Senoia Radio Tower, TCNS #60893, Senoia, Coweta County, Georgia

Dear Ms. Morley:

On behalf of Mikko Oscola Clayton Sylestine and the Alabama-Coushatta Tribe, our appreciation is expressed on your efforts to consult us regarding TCNS #60893 in Coweta County.

Our Tribe maintains ancestral associations within the state of Georgia despite the absence of written documentation to completely identify Tribal activities, villages, trails, or burial sites. However, it is our objective to ensure significances of Native American ancestry, especially of the Alabama-Coushatta Tribe, are administered with the utmost considerations.

Upon review of your March 29, 2010 submission, no known impacts to religious, cultural, or historical assets of the Alabama-Coushatta Tribe of Texas are anticipated in conjunction with this proposal. However, in the event of inadvertent discovery of human remains and/or archaeological artifacts, activity in proximity to the location must cease and appropriate authorities, including our office, notified without delay.

Should you require further assistance, please do not hesitate to contact us.

Sincerely,

Bryant J. Celestine
Historic Preservation Officer
Alabama-Coushatta Tribe of Texas

Dear Dina M Bazzill,

Thank you for using the Federal Communications Commission's (FCC) Tower Construction Notification System (TCNS). The purpose of this email is to inform you that an authorized user of the TCNS has replied to a proposed tower construction notification that you had submitted through the TCNS.

The following message has been sent to you from Archaeological Data Analyst Jennifer L Pietarila of the Seminole Tribe of Florida in reference to Notification ID #60893:

To Whom It May Concern,

The Seminole Tribe of Florida Tribal Historic Preservation Office (STOF-THPO) has received your email correspondence concerning the aforementioned project. The STOF-THPO concurs with your findings of "no historic properties" for direct effects and "no effect" for visual effects. However, the STOF-THPO would like to be informed should any archaeological and/or historic resources be discovered inadvertently during the construction process. We thank you for the opportunity to review the information that has been sent to date regarding this project.

We look forward to working with you in the future.

Sincerely,
W.S. Steele,
Tribal Historic Preservation Officer

RE: TCNS # 60893
Senoia Radio Tower
300 Howard Road
Senoia, Coweta County, Georgia
ECA Project No. L-568-2

Dear Ms. Morley,

In keeping with the Federal Communications Commission (FCC), the National Environmental Policy Act (NEPA)d, and Section 106 of the National Historic Preservation Act (NHPA), 36 CFR Part 800, this letter is to acknowledge that the Muscogee (Creek) Nation has received notice of the proposed construction of a 350-foot self supporting lattice communications structure at the above referenced location.

After reviewing all pertinent information and our records, at this time we are unaware of any historic, cultural, religious or sacred sites at this exact location. Therefore, we recommend a finding of "No Effect" for the proposed undertaking.

Furthermore, due to the historic presence of our people in the project area, inadvertent discoveries of human remains and related NAGPRA items may occur, even in areas of existing or prior development. Should this occur we request all work cease and the Muscogee (Creek) Nation and other appropriate agencies be immediately notified.

Should further information or comment be required please do not hesitate to contact me at (918) 732-7678, FAX: (918) 758-0649, or by E-mail: espain@muscogeenation-nsn.gov Thank you.

Sincerely,

A handwritten signature in red ink that appears to read "Emman Spain".

Subject: TCNS No 60893

Dear Dina,

We are hereby requesting consulting party status on any proposed projects that the Federal Communications Commission undertakes in the area of TCNS No.60893 located near Senoia, Georgia.

We would also strongly remind the Federal Communication Commission that it is their duty to consult with Indian tribes on a government-to-government basis and not that of the contractor. It is the duty of the agency official to “acknowledge that Indian tribes and Native Hawaiian organizations possess special expertise in assessing the eligibility of historic properties that may possess religious and cultural significance to them.” As a contractor, you are aware of expenses that are incurred to provide your professional services. The Thlopthocco Tribal Town is also being asked to provide a professional service and therefore, should be compensated for their expertise. Our fee of \$150.00 per site will be sufficient to cover our time and expenses. If tribal representatives should have to travel to the site area, mileage, per diem and lodging, should be paid for by the Cell Tower Contractor.

If you have any questions, please feel free to contact me at (405) 786-2579, cell (405) 220-2195 or by e-mail at chascoleman@prodigy.net. Thank you for your time and cooperation in this matter.

Sincerely,

Charles Coleman
Tribal Historical Preservation Officer

Hello Mr. Coleman,

Thank you for your response. ECA mailed the requested review fee for this project to your office on March 5, 2010. I wanted to inform you that for this proposed project, the tower was initially proposed as a guyed-type structure, but is now proposed as a self-supporting lattice communications structure. The tower height and location will remain the same.

Please let me know if you would like to consult further due to the tower type change. Because there are no

changes to the project other than the change in proposed tower type, I will presume that you have no further comments regarding this site and that construction activities at the site can proceed as planned if we receive no further comments from you within 30 days. Thank you and please feel free to contact me with any questions or if you require any additional information.

Sincerely,

Dear Dina M Bazzill,

Thank you for using the Federal Communications Commission's (FCC) Tower Construction Notification System (TCNS). The purpose of this email is to inform you that an authorized user of the TCNS has replied to a proposed tower construction notification that you had submitted through the TCNS.

The following message has been sent to you from THPO Kim Jumper of the Shawnee Tribe in reference to Notification ID #60893:

WE HAVE UPDATED OUR PROCEDURES FOR 2008 (EFFECTIVE 1-14-08). PLEASE MAKE SURE THAT YOU HAVE RECEIVED AND READ A COPY OF OUR UPDATED PROCEDURES .

Please use only the following address when sending materials to us:

Please use this fax number to contact us: 918-542-9915. Please do not contact us via e-mail.

SHAWNEE TRIBE
ATT: KIM JUMPER
HISTORIC PRESERVATION DEPT.
29 SOUTH HIGHWAY 69A
MIAMI, OK 74354

The Shawnee Tribe is interested in consulting on this tower, as we are in all towers in this geographic area. Ms. Kim Jumper is our manager for cell tower consultation. Please contact Kim Jumper, Asst. THPO, at 918-542-2441 if you have any questions on this or any other TCNS project.

For this particular tower to which we are responding, please follow our consultation procedures. If this tower is a CO-LOCATION, please fax us and let us know. We cannot always reliably tell from the TCNS web site when a tower is a co-location.

PLEASE, when you are mailing us regarding a cell tower, be sure to put Kim Jumper's name and Historic Preservation Department in the address. If you send any mailing just generally to the Shawnee Tribe, without including the name and department, several days or more may pass before the mailing is properly directed.

In the event that you are building another tower in this state and you did not receive a response from us through the TCNS, it is because the project was omitted from the TCNS web site, as we respond to ALL towers listed in our geographic areas on that web site. We take this opportunity to remind you that, even if a tower has been omitted from the TCNS web site, as occasionally happens, we are still interested in consulting on it.

For your convenience, the information you submitted for this notification is detailed below.

PHONE NUMBER: _____

MEMO: 60893, 60896

Message: The Shawnee Tribe's Tribal Historic Preservation Officer concurs that no known historic properties will be negatively impacted by construction of this tower site.(see memo line above for TCNS number/s). The Shawnee Tribe's archives do not reveal any issues of concern at this tower location. In the event that archaeological materials are encountered later during construction, use, or maintenance of this tower location, please re-notify us at that time as we would like to resume consultation under such a circumstance.

The Shawnee Tribe's Environmental and Natural Resources Department takes this opportunity to express its concerns that telecommunication towers can have a potentially destructive impact on bats and migratory birds, particularly those that migrate at night, including species listed as threatened and endangered by both states and the federal government, as well as other species. The Shawnee Tribe suggests that this tower be constructed in accordance with the guidelines available from the US Fish and Wildlife Service to reduce the adverse effects of telecommunications towers on migratory birds; these guidelines may be found at: www.fws.gov/migratorybirds/issues/towers/comtow.html.

The Shawnee Tribe's Environmental and Natural Resources Department is further concerned that the proliferation of cell towers may play a role in honey bee Colony Collapse Disorder. We acknowledge that cell phone technology may not be to blame, especially by itself, as other potential causative factors for the decline have been noted, such as insecticides, tracheal and varroa mites [an immunosuppressant], other parasites, pesticides used on hives to eliminate parasites, genetically modified plants, Nosema fungus, Israeli Acute Paralysis Virus (IAPV) perhaps introduced from Australia in 2004, Kashmir Bee Virus [KBV], climate change and drought.

Finally, the Shawnee Tribe's Environmental and Natural Resources Department requests that cell tower sites, whenever remotely feasible, be restored to native vegetation. In all cases, habitat restoration can protect a variety of species, even in small project areas. The large number of cell tower sites provides an as yet unrealized opportunity for region-wide habitat restoration. The Tribe urges the cell phone industry to provide a model for native habitat restoration for other industries.

Please do not hesitate to call us for additional comment.
